## MY HEART AND MY HUSBAND

Adelle Garrison's New Phase Of REVELATIONS OF A WIFE

### CHAPTER 7

#### WHAT MADGE FACED THE DAY SHE RETURNED TO SCHOOL.

My reception at the Bayview high school when I returned to my duties after my week's enforced absence was as gratifying as it was unexpected.

True, Mr. Stockbridge, Miss Holcombe and a number of the other teachers had been solicitous in frequent telephone inquiries concerning my condition after my accident, and there had come an exquisite cluster of carnations from Alice Holcombe, which seemed to me to typify the spiciness of her sturdy yet tender nature. But I was unprepared to find the desk in my classroom covered with flowers, the gifts of my pupils, and to find the teachers waiting to welcome me as warmly as if I had been among them years instead of weeks.

If my vanity instead of my affections had been warmed by the demonstration it would have later received a serious blow, for it wasn't long before I saw clearly that while I still had reason to glow at my own popularity, yet a good share of the unusual interest evinced in me was due to the glamor that invested me as the wife of a picturesquely heroic American ace.

"Now see here, lady," the irrepresible Bess Dean declared, when at noon the teachers who didn't live near the schoolhouse were gathered in the comfortable teachers' sitting room for their luncheon. "You've got to come across. Here we were simply waiting with our mouths wide open to hear all about that wonderful hero husband of yours, and then instead of showing up here a week ago to save us from dying of ennui, you go and smash up your head or your heels—I haven't got it straightened out yet which—and we have to wait all this time to listen to you. Now begin at the beginning. Does he look like his pictures in the paper, or—"

"No More Doubts—"

"Might I suggest, Bess," drawled Alice Holcombe in her most provoking manner, "that as you so inelegantly express it, our mouths are wide open—painfully so—for some coffee, for which we've been waiting for some time. If you'll either repress your curiosity for a few more minutes or let somebody else attend to the coffee, Mrs. Graham may be in a better humor to talk."

With an impertinent moue, Bess Dean turned to the small electric grill upon which every noon the teachers in turn prepared coffee, tea and bouillon to supplement the cold lunches they brought from their several homes or boarding places.

"I want you to understand, Miss Holcombe," she said loftily, "deftly pouring the coffee into the cups before her, "that my mentality is of such a calibre that I can talk and attend to my duties also."

"No one doubts the fact that you can talk, Bessie, dear," another teacher put in slyly.

Miss Dean put the cups down suddenly and faced her tormentors, belligerently with hands against her slender waist.

"Now another word out of one of you," she declared, "and I done goes troo de winda, see?"

"Mercy! Grammarly! Bess! Pecosavi!" the laughing cries came from all corners of the room, and Miss Dean returned to her coffee sans with a satisfied little smile.

"I'll Do More—"

"I thought I'd put some manners on the lot of you," she said triumphantly as she passed the steaming cups. "Mrs. Graham, you're the only lady in the bunch. None of my spiel was meant for you. And now be good and show us a picture of your husband. I just know you have one. If I had a husband who was an ace I'd have his photograph lithographed on every gown I owned."

I flushed painfully. I did carry a picture of Dick with me, but it was a cherished miniature in a locket, one sacred with memories, I could no more have displayed it to these careless girls

than I could have cut my hand off for them.

Alice Holcombe promptly came to the rescue.

"Tastes in tattooing sometimes differ, Bess," she drawled. "I don't share your belief that Mrs. Graham has her husband's photograph sewed into her dress. But I know she'll bring some of him in uniform tomorrow if she has them."

"I'll do more than that," I said with a grateful look at Alice Holcombe. "I'll go through my husband's collection of photographs which he acquired over there, and bring the most interesting and some of the souvenirs over tomorrow or the first day I can show you. I intend to let my pupils see them anyway."

"What's the matter with bringing Friend Husband over and putting him on exhibition?" Bess Dean asked audaciously.

"Now you needn't frown at me in that tone of voice, Alice Holcombe. You know perfectly well I'm only anticipating Kenny by an hour or two."

She turned to me in laughing explanation.

"Kenny is simply nuts about having celebrities talk to the school and then entertaining them afterward," she said. "And it so happens that dear little Millie, just back from being on punishment in the sanatorium, will be on her best behavior for a month or two. Therefore, you can wager your last cent that Kenny's planning this very minute just how best to put his invitation up to you."

(To be continued)

"I sometimes wish you'd give me a little money without my having to ask for it," said she.

"I sometimes wish you'd give me the chance," said he.—Detroit Free Press.

## Hot Water Each Morning Puts Roses in Your Cheeks

To look one's best and feel one's best is to enjoy an inside bath each morning to flush from the system the previous day's waste, sour fermentations and poisonous toxins before it is absorbed into the blood. Just as coal, when it burns, leaves behind a certain amount of incombustible material in the form of ashes, so the food and drink taken each day leave in the alimentary organs a certain amount of indigestible material, which if not eliminated, form toxins and poisons which are then sucked into the blood through the very ducts which are intended to suck in the only nourishment to sustain the body.

If you want to see the glow of healthy bloom in your cheeks, to see your skin get clearer and clearer, you are told to drink every morning upon arising, a glass of hot water with a teaspoonful of limestone phosphate in it, which is a harmless means of washing the waste material and toxins from the stomach, liver, kidneys and bowels, thus cleansing, sweetening and purifying the entire alimentary tract, before putting more food into the stomach.

Girls and women with sallow skins, liver spots, pimples or pallid complexion, also those who wake up with a coated tongue, bad taste, nasty breath, others who are bothered with headaches, bilious spells, acid stomach or constipation should begin this phosphate hot water drinking and are assured of very pronounced results in one or two weeks.

A quarter pound of limestone phosphate costs very little at the drug store but is sufficient to demonstrate that just as soap and hot water cleanses, purifies and freshens the skin on the outside, so hot water and limestone phosphate act on the inside organs. We must always consider that internal sanitation is vastly more important than outside cleanliness, because the skin pores do not absorb impurities into the blood, while the bowel pores do.

Women who desire to enhance the beauty of their complexion should just try this for a week and notice results.

## Start Tonight This new way to beautiful teeth

Your druggist today has a new way of teeth cleaning. And a ten-day tube is free.

Millions of people now employ it. Leading dentists everywhere advise it. You would never go without it if you knew.

Go ask for that free tube. There are few things more important than well-protected teeth.

### Remove the film-coat

You brush teeth now, but you leave much of the film. A viscous film clings to the teeth, enters crevices and stays. The ordinary tooth paste does not end it. So teeth too often discolor and decay.

Dentists now know that the reason lies in film. That causes most tooth troubles. And, until one ends it, brushing fails to save the teeth.

It is the film-coat that discolors, not the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acid. It holds the acid in contact with the teeth to cause decay.

with the 10-Day Tube tells the reasons for them.

One ingredient is pepsin. Another multiplies the starch digester in the saliva to digest starch deposits that cling. Each application also multiplies the alkalinity of the saliva—to neutralize the acids which cause tooth decay.

Two factors directly attack the film. One keeps the teeth so highly polished that film cannot easily adhere.

Day by day we fight the film and all its ill effects. You see the results in whiter teeth. You feel them in cleaner teeth. But the great results are such protection as teeth never had before.

You owe yourself a knowledge of these facts. Old ways of brushing have proved sadly inadequate. Nearly everybody at some time suffers troubles caused by film.

Now science knows how to combat film, and in ten days you can know. Never again will you trust the old ways when you know the new.

**Teeth will glisten when the film-coat goes**

Get this free tube and watch it. Note how clean the teeth feel after using. Mark the absence of the slimy film. See how teeth whiten as the film-coat disappears.
