SALEM IS THE DEHYDRATION CENTER OF THE WORLD

Do you realize what that means?

It means that there is a market, and a growing market for every vegetable and fruit that can be raised on the land in this territory.

And that means more than is apparent to the stranger at first glance; for a greater variety of fruits and vegetables can be successfully grown here than in any other part of this country or the world.

Dehydration is the greatest thing in the world, in food conservation.

It takes out the water; the consumer puts it back, at any time in the future, anywhere under the shining sun—and then he has the fruit or the vegetable as good as fresh, in every nutritive quality, and in every other way.

The saving will be billions, annually. And all the money comes to Salem excepting what is expended for the nails in the shipping boxes.

Better than a gold mine; for it will never "pinch out."

KING'S PRODUCTS COMPANY

SALEM OREGON

(This company is committed to the growth of this community, by a program that will make its output ten times its present output—that will employ 2500 people at its factory; that will pay to the growers \$20,000,000 a year for their products.)

Why An Indiana Silo?

Here are ten good reasons why a silo should be on every farm where livestock is kept:

1. The silo preserves the palatability and succulence of green crops for winter feeding.
2. It conserves the entire crop.
3. The silo increases the livestock capacity of the farm.
4. Silage can be fed in summer when pastures are short.
5. Silage is relished by dairy and beef cattle and sheep.
6. It is digestible and aids in the digestion of other feeds fed with it.
7. Silage reduces the cost of production of milk, beef and mutton.
8. It will increase the milk flow.
9. Silage promotes the health of the herd.
10. The silo provides an economical method for the storage of roughage.

SALEM OREGON

Raise Sugar Beets and Build a Beet Sugar Factory in Salem

Salem should build a beet sugar factory; the great fruit canning and fruit juice and jam and jelly interests here can take the whole output of a factory of considerable size, and the local market could absorb the balance of the output of a big concern—

And the right kind of a man, under the proper auspices, knowing the business, could find the capital now to build such a factory and operate it.

This would keep a big annual sum of money at home; would give employment to a large number of factory operatives—

And it would give employment in the country to many hands and put to profitable use vast acres of land. It would be good for the land, as a rotation crop.

It would supply a large amount of additional feed for dairy cows.

In many respects, this is one of the most important industries to be developed in the Salem district.

The Salem Slogan subject for next week will take in a number of things: Sorghum, tomatoes, garlic, horse-radish, mushrooms, rhubarb, kale, etc.

DID YOU KNOW that the lands in the Salem district are as well adapted to the growing of sugar beets with a high sugar content as the best beet sugar lands of Germany; that the great Salem fruit district, using and due to use vast quantities of sugar annually, can raise its own sugar beets and establish and maintain its own sugar beet factories, and can do it at a profit; that, in the service of a self-contained prosperity and growth, this ought by all means to be done, and done as soon as possible; that there is ample capital here now, if assembled cooperatively under the right sort of auspices and leadership, to accomplish this very desirable end, and that our farmers ought to plant sugar beets now and experiment in the making of their own home supply of beet sugar syrup, familiarizing themselves with the growing of the sugar beets and hastening the building of beet sugar factories?
