SALEM IS THE DEHYDRATION CENTER OF THE WORLD

Do you realize what that means?
It means that there is a market, and a growing market for every vegetable and fruit that can be raised on the land in this territory.
And that means more than is apparent to the stranger at first glance; for a greater variety of fruits and vegetables can be successfully grown here than in any other part of this country or the world.
Dehydration is the greatest thing in the world, in food conservation.
It takes out the water; the consumer puts it back, at any time, in the future, anywhere under the shining sun—and then he has the fruit or the vegetable as good as fresh, in every nutritive quality, and in every other way.
The saving will be billions, annually. And all the money comes to Salem excepting what is expended for the nails in the shipping boxes.
Better than a gold mine; for it will never "pinch out."
KING'S PRODUCTS COMPANY
SALEM OREGON
(This company is committed to the growth of this community, by a program that will make its output ten times its present output—that will employ 2500 people at its factory; that will pay to the growers \$20,000,000 a year for their products.)

"It's The Indiana Silo"

"If a man writes a better book, preach a better sermon on build a better mouse trap the world will make a beaten path to his door though his house be a hut in the woods."

The path to the home of the INDIANA SILO is wide and straight and is becoming more so each day. Would you be interested in knowing why?

Yes; Dehydration Is The Biggest Thing In The World

The Salem Slogan editor has said many times that dehydration is the biggest thing in the world in food conservation—
And he has frequently asserted that Salem is the dehydration center of the world.
These facts have not lost any of their importance; they grow more manifest and important from day to day.
The Salem dehydration plant of the King's Food Products company has been increased at least 50 per cent in efficiency and capacity this year—
And plans are under way to again double it for the 1922 crop.
Arrangements have been perfected and the Star Fruit Products Co. has entered the Salem field, in cooperation with the King's plant, the by-products part of which it will have charge—
And the Star people will also put up here a large tonnage of cherries for maraschino purposes; they are the largest maraschino concern on this coast.
Also, this combination will make an outlet for 3000 tons more of loganberries, this year.
The great thing, however, is dehydration. It puts our ripe fruits and fresh vegetables onto the tables of all the world, with the simple addition at the point of consumption of the water taken out here—
And every cent of the money is kept here but that paid for the nails in the outside cases.
Slogan subject for next week, Hops.

DID YOU KNOW that Salem is the dehydration center of the world; that dehydration is the biggest and most important thing in the world in food conservation; that the King's Food Products Co., with its principal plant in Salem, increased 50 per cent this year in capacity and proposed to be doubled in capacity again next year, is "putting over" the marketing of dehydrated fruits and vegetables; that the demand is growing and widening to the whole circle of the globe; that this company has arrangements perfected for the use of a much larger volume and range of by-products; that thus a high degree of prosperity is insured and absolutely stabilized for the Salem district; and that nothing could possibly be more important than the continued expansion of this great manufacturing plant in the way of material upbuilding and growth of both the country and the city that is its manufacturing, marketing and shipping center?
