SALEM IS THE DEHYDRATION CENTER OF THE WORLD

Do you realize what that means? It means that there is a market, and a growing market for every vegetable and fruit that can be raised on the land in this territory.

And that means more than is apparent to the stranger at first glance; for a greater variety of fruits and vegetables can be successfully grown here than in any other part of this country or the world.

Dehydration is the greatest thing in the world, in food conservation.

It takes out the water; the consumer puts it back, at any time in the future, anywhere under the shining sun—and then he has the fruit or the vegetable as good as fresh, in every nutritive quality, and in every other way.

The saving will be billions, annually. And all the money comes to Salem excepting what is expended for the nails in the shipping boxes.

Better than a gold mine; for it will never "pinch out."

KING'S PRODUCTS COMPANY

SALEM OREGON (This company is committed to the growth of this community, by a program that will make its output ten times its present output—that will employ 2500 people at its factory; that will pay to the growers \$20,000,000 a year for their products.)

10 per cent. More Butterfat

Ten per cent more butterfat! That's what the University of California's string of twenty-six cows tested after eating silage rations.

Official Statement U. C. Agr. Bulletin 282.

Through addition of Indian corn silage or milo silage, to rations of alfalfa hay, or alfalfa with grain feeds, an increase in production amounting to from ten to twenty-five per cent was secured—butterfat was increased by about ten per cent.

An Indiana silo will help you add this ten per cent to your cream check. Twenty thousand Pacific Coast farmers earn greater profits with Indiana Silos.

Our Ideal, to Make Salem The World's Most Beautiful City

Salem is the most beautiful city in the West— And it is the world's most beautiful city in the making. Our people now realize the immense commercial advantages of beauty in a city, and the spirit of cooperation for making Salem year by year more beautiful is taking hold. There may be utility in beauty, too; as for instance, the planting of more filbert and walnut trees. Some one recently said that if all the shade trees in Salem were Franquette and Mayette walnut trees in full bearing, the crop of walnuts from those trees would pay the annual taxes on the property on and in front of which they stood— And the same would be true of Barcelona, Du Chilly and Clackamas or Davidiana filbert trees— And both walnut and filbert trees are beautiful and worthy to grace any lawn or curb or wide expanse or nook on public or private grounds. What Salem needs is 5000 or more members of the Salem Floral Society, with that organization in funds to carry on a constant campaign with vigor. Does any one doubt that the \$5000 a year investment that this would entail, spread over the city at the rate of a dollar a year for each member, would be a good investment? Next week's Salem Slogan subject will be Schools.

DID YOU KNOW That Salem has fifty solid blocks of rose hedges; that better tulips can be and are being grown here than in Holland; that the gay gladiolus, Salem's official flower, waves its banners in victory here; that our dahlias are spreading our fame far and wide; that in annuals and perennials we can grow all the favorites to perfection, and we have glorious native flowers and shrubs; that, with our meandering streams through the city and our wide streets and hills and rich soil and splendid setting, Salem is well on the way towards becoming the world's most beautiful city, and that the Salem Floral Society has ambitions and plans to make it such; and that devotion to the ideals of "Salem Beautiful" will enhance the value of all property here, and make Salem the best home city on earth; and that the people here are now awake to the commercial value of making Salem annually more beautiful?

CLETRAC Tank-Type-Tractor

As soon as the plowing job is finished, hook the Cletrac to the harrow and seeder, and finish the job.

The CLETRAC rides the top of the soil lightly and does not pack the ground.
