## DRIED LOGANS TO BE PACKED

Car Containing Eight and One-Half Tons is Sent To Association

A car containing eight and one-half tons of dried loganberries has been sent to the Oregon Growers association here where the berries will be processed and packed in eight-ounce packages for shipment. The package is about the same size as that in which raisins are sold and is convenient for household use.

When the berries are soaked overnight they assume their original size and shape and closely resemble the fresh berry in flavor, appearance and taste, making a delightful sauce or jam as desired.

Dehydrated berries represent less than one-fifth of their weight when fresh and average about 18 per cent as heavy as in the green state. This would indicate that nearly 50 tons were used to make a single carload of less than nine tons.

The berries will keep for many months in this condition and drying this year has proven to be a means of saving many tons of logans that would otherwise have been lost during the early part of the season when the canneries were not in a position to handle them.

Sheridan and the territory contributing to it produced 100 tons of loganberries this year and the tonnage of that district which was not handled by the association went to the Graves Canning company and the Brown-Shipley loganberry company for canning and juice making.

Rodeo Association is Organized at Klamath

The Fort Klamath Rodeo association, with a capital stock of \$5000, has been incorporated by H. B. Loosley, J. W. Utter and C. W. Engle. Articles of incorporation were filed by the association in the state corporation department yesterday.
