AT THE LIBRARY New Books "California Trails" the story of California's missions told with interest and illustrated with full-page plates, by Trowbridge Hall. "A Prisoner of Trotsky's" one of the functions of government described as observed in 72 cities from Boston to Los Angeles, with suggestions for improvement drawn largely from European cities, by Raymond E. Fosdick. "Our statesmen were made dupes for the more crafty Lloyd George and Clemenceau," said "France and England divided every thing up as they pleased, Italy with 5,000,000 men in the field, got only 7 per cent of the indemnity. Austria and the allies gave Italy that great hilly territory lying to its north with 2,000,000 starving and helpless people." Mr. Robertson has a very low opinion of Servian officers. In Jugoslavia, there is great mismanagement, he said. In Austria he saw the children of princes and dukes standing in the bread line, not permitted to carry food home to their parents. The food was being distributed by Americans, with France refusing to help on account of the extreme hatred of the French towards Austrians. New Nations Impudent. The new nations are impudent, declared Mr. Robertson. They have put up tariff barriers against Austria and this includes the new nation of Czechoslovakia. Conditions were bad in Poland when Mr. Robertson was in that country last March. The Poles have an alliance with the French, he said. The Belgians have no polish and he didn't like them much, but they are hard workers. "France is better off now than any country in Europe," said Mr. Robertson. "Fully 90 per cent of the devastated area was cultivated this past season. But people are still living in hovels in the war zone of France. France needed help less than any country in Europe. Natives Drink Human Blood. Mr. Robertson was present in Cairo when the natives hunted the streets, killing every white person they could find, actually drinking their blood. He said he saw this from the Shepherd hotel in Cairo. "As to the devastated area in France, every person in that area now has twice as much money as he ever had. France had been successful in getting more help than all others." Other opinions expressed by Mr. Robertson, based on his inside knowledge of affairs in Europe are as follows: "Italy friend of America. The Germans are working 16 hours a day. They can't pay the indemnity unless they work and are allowed to export. "Italy is the friend of this country. There is no hatred in Italy. "The French help no one except the French. "During the troublesome times of the summer of 1918, the English army was running so fast from the Germans, that I had to travel 25 miles a day trying to locate headquarters. "If we don't stop building warships, something is going to happen to the nations of Europe. European Tariffs High. Europeans do not want our automobiles competing with their own manufacture. France has a tariff of 45 per cent against us and England 23 per cent. In fact, the European countries raised tariffs so fast against this country, that I could hardly keep the Ford office informed fast enough to prevent serious mistakes. All the markets of the world are shut against us. "In Egypt last spring, cotton dropped from \$190 a bale to \$36 and this was done in one month. Egyptians are 95 per cent illiterate and not fitted for government. If Egypt had self-determination, there wouldn't be a white person left alive in that country. French Called Unjust. The English are just to their colonies. No so the French, who especially mistreat the natives of Syria, over which France has a protectorate. "The British are doing great things for Palestine, building roads and helping the country develop. "The new countries such as Bulgaria, Jugoslavia, Czechoslovakia, and Poland include many people that hate each other and trouble is sure to follow. "American statesmen were no match for the trained diplomats of Europe, especially Lloyd George and Clemenceau. The best friend of America, Orlando of Italy, was kicked out of the final conference by Lloyd George and Clemenceau. England and France divided up the spoils of war. Bread Line Will Grow. There will be 100,000 more

SPEAKER TELLS INSIDE FACTS

Robertson Declares Americans Duped by Lloyd George and Clemenceau PRAISE GIVEN ITALIANS Commercial Club Listens to Interesting Address by Ford Attorney

"If you want to know what real suffering is, go to London and see the ex-service men, many of them officers, standing around on street corners playing hand organs, many of them with musks on their faces," declared Mr. Robertson, speaking yesterday noon to members of the Salem Commercial club at the weekly Monday luncheon. Having spent a number of years traveling in all European countries on business missions for the Henry Ford interests, Mr. Robertson felt at home with his subject and gave an address telling many inside facts never mentioned in dispatches. "Americans Were Dupes. "Our statesmen were made dupes for the more crafty Lloyd George and Clemenceau," he said. "France and England divided every thing up as they pleased, Italy with 5,000,000 men in the field, got only 7 per cent of the indemnity. Austria and the allies gave Italy that great hilly territory lying to its north with 2,000,000 starving and helpless people."

Fortune is Inherited, Independence Home Bought

INDEPENDENCE, Or., Aug. 8. (Special to The Statesman.)—John Haun and wife, who some time ago fell heir to an estate of over \$75,000, have decided to get all the comfort of life that is possible, and a few days ago purchased the F. S. Stewart bungalow, located on the north side of Main street. The fortune was left to Mrs. Haun, who says she will divide it with her husband, to whom she was married a few months ago. Mr. Haun is past 70 years old, and spent most of his life on a farm, but Mrs. Haun has always desired to live in town, and feels now that her desires will be realized. They will improve their residence and enjoy all the latest appliances that go to making a home convenient.

Beaver Company Firm in Cement Rate Case

The Beaver Portland Cement company yesterday filed a complaint with the public service commission as intervenor in the action of the Oregon Portland Cement company and the Portland Traffic & Transportation association against the Southern Pacific company. The Beaver company contends that not Oswego alone should be entitled to joint rates, and that if any change in rates to O.-W. R. & N. points results from the proceedings the change should take the form, not of eliminating joint rates from all mills except Oswego, as the plaintiffs request, but rather of establishing such joint rates from Gold Hill as will put that plant on a parity with Bellingham. The plaintiffs in the action seek to obtain some adjustment in rates on cement from Oswego and to have eliminated the 15 cent rate on cement from Gold Hill to Portland.

YOUNG ERICKSON WITH SURVIVORS

Son of Willamette Professor Picked Up After Wreck of Alaska

Prof. Frank M. Erickson, Sr., of Willamette university has received word that his son, Frank M. Erickson, Jr., who was aboard the ill-fated steamship Alaska, has been saved. He is 20 years old. The young man was graduated from the University of Idaho in June and was on his way to the University of California to accept a teaching fellowship in physics. Sunday night Professor Erickson received a wireless from the young man with the one word, "Saved." Yesterday he received a night letter from his son with information that he had been picked up in the sea by another boat and taken to Eureka. He says he lost everything he had in his possession on the ship and that the people of Eureka are caring for him. The steamship company will take him on to San Francisco.

If Washington keeps her building-money at home, why shouldn't we?

(From the Daily Record-Abstract, Portland, July 27, 1921.) A Message to Oregon State Board of Control and Other State, City and County Officials

Advertisement for Associated Industries of Oregon. The State of Washington has a newly created body known as the department of business control, whose director is T. E. Skaggs, with offices at Olympia, Wn. The department is empowered with the administration and purchasing of all materials, the letting of contracts, etc., for the following institutions: Western State Hospital, Eastern State Hospital, Northern State Hospital, State Custodian School, State Soldiers' Home, Soldiers' Colony, Washington Veterans' Home, State School for the Deaf, State School for the Blind, State Penitentiary, State Training School, State School for Girls and State Reformatory. According to a statement issued by Mr. Skaggs, no firm, not a resident of the State of Washington, has a chance to secure a contract or to furnish supplies. In a letter addressed to the Record-Abstract, under date of July 25, Mr. Skaggs states: "We beg to say that we do not advertise out of our state, nor is it probable that we will award a contract to a bidder outside the state." Recently the Oregon State Board of Control awarded a contract to a Montana firm for a \$150,000 hospital to be built at Pendleton; a Boise firm secured the contract for the \$100,000 auditorium to be built at The Dalles, and other large building projects were given to Washington contractors, regardless of whether they were residents or non-residents. What we want is reciprocity, and if the Washington officials exclude Oregon contractors and business houses from participating in their business, Oregon officials, too, must take similar action and exclude Washington firms from participating in the business being done by our public institutions. The proposition can work both ways and immediate action must be taken. Any official who wishes to ascertain for himself can view the letter which is now on file at the offices of the Daily Record-Abstract. When equal or preferred chance is given to Oregon-made products in doing work and letting contracts, by so much it helps those who are employed to retain their jobs. If Oregon products are not favored somebody will get laid off and add to the unemployed. Associated Industries of Oregon
