HERE was a great exodus from the city during Labor day week-end and many families closed their minds to business and household cares to seek quiet spots at the seashore or mountains in order to enjoy to fullest capacity these days when summer's sun is brightest. Last evening many parties of tired but happy excursionists returned with spirits freshened to begin anew the daily round of duties. House parties at the beaches were drawing cards for many while the quiet rest of the mountains with the lure of good fishing holes proved equally popular to the sportsman. Many automobile parties were planned, having for their destination some interesting spot upon the Columbia highway.

And now the vacation days

## GLASS OF SALTS CLEANS KIDNEYS

If Your Back Hurts or Bladder Bothers You, Drink Lots of Water

When your kidneys hurt and your back feels sore, don't get scared and proceed to load your stomach with a lot of drugs that excite the kidneys and irritate the entire urinary tract. Keep your kidneys clean like you keep your bowels clean by flushing them with a mild, harmless salts which removes the body's urinous waste and stimulates them to their normal activity. The function of the kidneys is to filter the blood. In 24 hours they strain from it 500 grains of acid and waste, so we can readily understand the vital importance of keeping the kidneys active.

Drink lots of water—you can't drink too much; also get from any pharmacist about four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast each morning for a few days and your kidneys will act fine. This famous salts is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean and stimulate clogged kidneys; also to neutralize the acids in urine so it no longer is a source of irritation, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep their kidneys clean and active. Try this, also keep up the water drinking, and no doubt you will wonder what became of your kidney trouble and backache.—Adv.

**SAID that great Movie Producer, Oscar B. DeMille, to his latest rival, Movie Producer D.W. Griffith, "I have worked ten long years which you see beneath each one of the four codes, whether you read them or not."**

**HERE IS THE WAY THEY DID IT.**

"It's easy," said Chief-of-Detectives O'Flynn. "I have worked ten long years which you see beneath each one of the four codes."

"Add up these four sums and your total gives you the four names. You go about it this way. Each secret code has ten letters in it. Each letter represents a number. The first letter of the code represents 1, the second letter represents 2, the third letter represents 3, the fourth letter represents 4, the fifth letter represents 5, the sixth letter represents 6, the seventh letter represents 7, the eighth letter represents 8, the ninth letter represents 9, the tenth letter represents 10."

"Each sum, as you see, instead of numbers is made up of letters, but it contains only the letters that are contained in the code above it."

"Now change the letters of each sum into their equivalent numbers, according to the code above, putting them down line by line from left to right exactly as the letters; for instance, the first letter of the first sum is N, so you will see in the first letter of the secret code above that sum and therefore substitute number 14 in the second letter in the first line of the first sum to the right of the letter N. The letter O is the second letter in the code above the first sum, therefore the first letter represented by the letter O in the code above the first sum will have the name of the Movie Star represented by that sum."

This is not an easy problem, but patient and perseverant may find you the names of the great Movie Stars. For the best answers submitted we will pay the following prizes:
