## L. H. Roberts Writes of Conditions in Iowa

L. H. Roberts of Salem, who a few weeks ago went back to Iowa to investigate immigration conditions, writes interestingly of what he finds in the Hawkeye state. "There are thousands and tens of thousands of good farmers who would like to get away, but they can't well let go—neither the owners nor the renters," he says. "Back in long-settled countries like Iowa, there is an excellent, permanent class of renters, who by thrift may give accumulated bank and stock that would make any land owner feel rich. They are the most desirable class of immigrants for any new state. But this year, even the renters can't easily get away. They have a great crop, with corn running to 60 bushels or more an acre; but with the price down from 25 to 35 cents a bushel. Oats is down as low as 16 cents a bushel, or half a cent a pound. On the cash rent schedule that since the war has usually prevailed, the average renter would be bankrupt at the prices prevailing at the present time."

Mr. Roberts has had an interested audience of Oregon enthusiasts wherever he has gone, though few of them are able to come at this time. They expect to bid good-bye to the middle west as soon as they can do, which may be next year, or the year after, and come where there is a chance to pick up some of the land-price increase for their very own.

## AMERICA AIDS TO CURB REDS

Central and Eastern Europe Saved from Bolshevism By General Relief Work

## ANARCHY NOW CHECKED

Investigator is Confident United States Will Gain by Friends Made

NEW YORK, Sept. 6.—American feeding has saved Central and Eastern Europe from Bolshevism, according to J. H. Wallis of the League, la., representative of the American Relief administration, who has just returned from a five-month survey of American relief work in Europe.

The Hoover organization, Mr. Wallis said, had been upholding democracy in Europe and through its relief operations had stabilized and strengthened the new democratic regimes resulting from the war when they were threatened with forces of disintegration, because of hunger.

**Hoover's Work Praised**  
"Chief officials in some countries told me with perfect frankness," he added, "that American feeding had been their political salvation and in all countries even the most cautious and guarded officials admitted it was a very material aid. Private citizens were more downright and positive. 'American feeding saved us from Bolshevism,' was their general view."

Mr. Wallis expressed optimism concerning the economic and political future of the nation, declaring that it is "entirely a mistake to suppose that Europe is sinking." He said conditions were improving and order was being restored everywhere.

**Is Recovering**  
"In general, the aspect today of Central Europe and the Baltic is one of recovery," he added. "The recovery is perhaps not as rapid as it might have been if men and nations had been ideally wise, but it is substantial and promising. Although in some places there are distressing conditions, Europe is rising. There are still some international wrangles, such as Upper Silesia and the Polish Lithuanian dispute about Vilna; Austria, not yet adjusted to her new place in the world-order, is still suffering business stagnation. But the economic barriers between states are being broken down by commercial treaties, the railway systems are getting back to normality."

**Refers to Germany**  
"My investigation in Central Europe and the Baltic took me into Austria, Hungary, Czechoslovakia, Germany, Poland, Lithuania, Latvia and Estonia. In all of these countries I had the privilege of talking with the principal government officials, including Chancellor Wirth of Germany, Premier Witos of Poland, President Masaryk of Czechoslovakia, President Hainisch of Austria, Finance Minister Hagedorn of Hungary and the leading men of the Baltic republics. I also made it a point to get the views of the most prominent bankers and business men of the various countries. Beyond that, I have seen labor leaders, presidents of universities, workmen, peasants and refugees. "Perhaps most Americans do not entirely realize the manifold and ramifying effects—the vitally important effects—of the vast feeding operations of the American relief administration. Among these collateral effects may be mentioned the following:

"The spread of Bolshevism in Central Europe and the Baltic, the tendency of political violence, anarchy and chaos, have been effectively checked in a very large measure."

"The sovereign importance of the child has been impressed upon these countries. Effective methods of child-help have been taught. Permanent organizations for child-welfare work are being created. In every country aided by the American relief administration a big native organization has been built up to do the work under American supervision. About 100,000 people are included in all these organizations. These people have learned qualities which will be not only valuable to themselves but national assets."

**Tolerance Exists**  
"The comprehensive, impartial distribution of relief to people of all races and creeds has taught tolerance and brotherhood, has brought hostile classes and races and creeds together for the common good."

A hotel has just been erected in New York City bearing the name, "The Harding." It is presumed that all of the rooms have a sunny exposure, with hot and cold gas.

## The Well Dressed Woman

By GLORIA SWANSON,  
Star in Paramount Pictures.

Capes, so far as it is humanly possible to tell, are a bit on the wave, but if I am right in my prediction they are dying in a glorious after-math of small capes, shoulder capes and cape wraps. Nothing in the realm of tailormades is better than the cape suit and the cape coat.

The suit in the sketch is another French model that should fully satisfy the most ultra-fashionable woman.

A three piece suit, good for many occasions and again exploiting the waistcoat, as you like, is made of a plain material in the same shade as the body of the suit. I suppose it could hardly be called a waistcoat, though its front looks like one, for it has long, snug fitting sleeves, with soft cuffs of a long fur.

The cape is circular and rippling, to about sleeve length, and, while it falls away to disclose the jacket-bodice in front, is full enough to wrap easily about when the thermometer drops.

And, anyway, how could the most tropical flower feel cold in this suit's huge collar of fur. It has the autumn trick of fitting a bit away from your throat—warm enough and much more healthful than the tightly wrapped scarf or collar.

The skirt is full, plain and not too brief.

With this smart suit of patterned wool, I wear my duckiest new hat—a huge black velvet affair, rather small of crown and with a becoming droop to the brim.

The item that pleases me most, however, is the large quill that never strew on any earthly bird. It is made entirely of the softest and finest ivory white kid.
