School Begins Soon Many a so-called dull child is so because of some visual defect, which is sapping his vital energy. Teeth, nose, throat, stomach, even the feet, all receive due attention. But the child is sent to school without the least attention to the eyes—the main avenue to an education. When the youngster falls behind in his studies, the blame is laid upon everything but the real cause. The child is considered stupid or the teacher is blamed for his backwardness.
