The Difficult-To-Fit Figures  
MOST women resent the idea of wearing a health corset. To the average woman this means a loose, comfortable corset without a particle of style. This may be true of some corsets that are sold under this name, but not of the

MODART CORSETS  
Front Laced

The Modart front laced Corset offers, first, a real support to the figure. It is never loose. It hugs the figure as smoothly as a glove. Its scientific design enables it to exert gentle support at the proper points and there is an absence of pressure where pressure would be harmful. It poises its wearer correctly so the bodily weight is properly distributed and the wearer stands erect.  
The Modart Corset lacks neither style nor figure improving qualities. It possesses and imparts both.  
For those women who have experienced difficulty in being satisfactorily fitted, or who have been told that the peculiarities of their figure require a health corset, our expert fitters have an enjoyable surprise in the Modart.  
Recent arrivals of new Modart models complete our stocks for the season's requirements.
