

SUPERLATIVE ADVANTAGES OF WILLAMETTE VALLEY ARE TOLD

In speaking Wednesday noon to members of the Rotary club, R. J. Hendricks based his prediction that within a few years Salem would be a large city, on the actual fact that no section in the world can grow so many things exclusively and that no section has such diversified interests as this part of the Willamette valley.

"It is a fact that we grow so many things exclusively and so many things better than other sections, that assures us of the future of Salem and vicinity," declared Mr. Hendricks.

Berries Are Finest

"We grow the finest loganberries. In fact, this district may be called the home of the loganberry. And so with Italian prunes. We grow the finest in the world, with their tart-sweet flavor.

"We want more people to know of our great dairy interests. Very few know that in the price of butter-fat, there is a 7 cents a pound advantage in this valley over any location in the United States.

"At the Centennial exposition, away back in 1876, Oregon flax took the first premium on all points. We grow the best flax in the world. We should have a great industry here.

"We are the center of the greatest flax growing district in the country. They grow finer on our

foot hills and of better flavor than elsewhere.

Walnuts Are Superlative

"Our Oregon walnut has the best flavor of all walnuts grown and is superior to the California walnut. In California there are 40,000 acres in English walnuts, while Oregon has only 8,000 acres.

"The finest strawberries are grown in Oregon, and California comes to Oregon every year for its strawberry plants. We have a greater return per acre than any other strawberry growing state in the country.

"We have the finest flavored raspberry grown and it does not have to be replanted every second or third year as in parts of Washington.

"The finest mint in the world will grow near Salem. From a chemical analysis it has been proved that the mint grown here tests 51 per cent menthol while the highest for other sections of the country is 36 per cent.

Jersey Cows Best

"We are the center of the greatest Jersey interests in the United States. Do you know that we have seven of the gold medal Jersey bulls, while there are only 12 in the entire United States. We have the greatest Jersey cow in the world within a few miles of Salem.

"We are the Cherry City and we grow the wonderful Oregon cherries, the finest cherry in the country. With the exception of one, all these cherries originated in the Salem district.

"Our Oregon pears topped the market last year in London, New York and Chicago. Our Champion gooseberry is the greatest producer in the world. Nothing exceeds our spinach, and from California, they are coming for our seed potatoes.

"Our honey has the finest flavor of all and we only need to plant more sweet clover and similar products in order to keep the bees

busy all season. The bees are great pollinizers.

Advertising Essential

"And the same is true of broccoli. Its flavor is of the finest. Our Concord grapes compare most favorably with the famous New York Concord. We can grow the finest grade of sugar beets, equal to those grown in Germany or Utah. We know the high quality of our hops.

"And thus it is. We are the center of the greatest country in the world, and all we need is to advertise."

LABOR PROBLEM IS DISCUSSED

First of Series of Lectures Given Last Night at Waller Hall

The first of a series of lectures arranged by Professor Panunzio of Willamette university was held Wednesday evening. Dr. Edward T. Devine, formerly of Columbia university, delivered an address on "Labor and the Public Welfare," showing how closely related are the different interests of today. He said in part:

"We are in a period of revolution compared with which the world has hardly a precedent. Political democracy will not satisfy the aspiration of man. He does not value the political rights he has inherited but will get excited over the rights he has not attained.

"Today every one has the right to an economic life.

"Child labor is not entirely abolished in the United States. The labor question would be simplified if the problem of child labor were solved.

"There must be a health program which would mean the increase of efficiency—the illiterates, slackers and misfits must be gotten rid of.

"All of America's social welfare organizations are united in one conception, the conception of the standard of living.

REVERSES CAUSE HER TO TRY SUICIDE

Evelyn Nesbit, former wife of Harry K. Thaw, who tried to commit suicide by taking a large dose of morphine. Miss Nesbit received a disposition for non-payment of rent on a ten room which she operated. She went into a frenzy when her furniture was placed on a sidewalk.

fare organizations are united in one conception, the conception of the standard of living.

"Man is not to be exploited. Industry must be humanized. There must be individual responsibility and social responsibility to solve the problem of labor and the public interest."

For the coming winter a number of speakers will be secured by Professor Panunzio. Plans are being perfected to reach some very important and big men who

will come to the Pacific coast. From time to time the speaking

Large Prune Tonnage Shipped from Dallas

Serving as the assembly point for prunes, the Dallas plant has handled 13 cars in addition to its own tonnage. The Oregon Growers plant here is processing and packing prunes from all points in the Willamette valley from Monmouth to Oregon City where there are no plants to care for the fruit.

Linn county has been the heaviest contributor with six cars shipped from Albany and Lebanon. C. R. Widmer near Albany has one of the heaviest yielding orchards in the northwest and this year he produced 80 tons of prunes on 40 acres. Ten tons of these were 20's. This would be a mammoth yield for a normal season and is especially good for the present one.

Club Federation Urges Buying of Camp Grounds

Voting to attend the next council meeting in a body and urge purchase by the city of the site of the Salem auto camp ground, members of the Salem Federation of clubs last night expressed themselves as in favor of the further development of the camp grounds. The Salem city council will meet at 7:30 p. m., November 7.

At its session last night the club federation adopted by-laws and elected the following as members of its board of directors: Paul Wallace, L. J. Singler, E. McCroskey, Mrs. F. X. Elliott and L. W. Gleason.

Will of James Milne Is Admitted to Probate

The will of James Milne, who died October 3, was admitted to probate yesterday. The widow, Maria Milne and son Everett Milne were named executrix and executor.

The will, which was made April 9, 1919, gives to his two daughters, Nellie and Verne, the south 51 acres of his farm in T 6 S R 2 W, subject to the one-third right

of the widow during her life time. Each of the two daughters is also willed \$750.

To his son Everett, there was willed the remainder of the 131-acre farm, subject to the one-third interest of the widow during her lifetime. To Everett Milne was also willed all horses and farming machinery.

To the widow, Maria Milne, was willed for life a one-third part of the profits of the 131-acre farm and also the home on the farm. If the children do not rent any part of the farm, the widow is given authority to rent or plant.

St. Louis Globe-Democrat—The jazz craze, we are informed, has just reached Petrograd. We wish it would stay there.

Brumfield Very Weak in Cell at State Prison

Dr. R. M. Brumfield, Roseburg dentist, now confined at the state penitentiary under sentence to hard for the murder of Dennis Russell, is in a very weak condition physically, according to Warden Compton. Brumfield was suffering with toothache yesterday and did not feel equal to climbing the stairs to the prison hospital for treatment. The bridge in his teeth, which it was believed for a time he removed and slashed his throat when he attempted suicide in the Douglas county jail has been taken out.
