

By MARGUERITE GLEESON

MEMBERS of the Salem Arts League, who heard Miss Florence Holmes of the Portland bureau of parks talk on civic problems recently, will be interested to know that she has been granted a leave of absence by the bureau in order to take post graduate work at the Cambridge school of landscape architecture in Boston.

Miss Holmes was offered a scholarship for this course and accepted. During her stay in Boston she will be the guest of Mr. and Mrs. James Sturgis Pray. Mr. Pray is head of the department of architecture in Harvard university.

While in the east Miss Holmes will make investigations of a

number of eastern parks. She will probably leave Portland Sunday.

Miss Holmes is a graduate of Oregon Agricultural college, where she majored in landscape architecture and later went abroad to study for several months. On her return she spent some time in the east. She is one of the few women landscape architects in the country and probably the only one who holds the office of municipal landscape architect. During the past summer several prominent eastern architects who visited Portland became interested in her work and the scholarship came as a result and was a complete surprise to Miss Holmes.

Miss Gertrude Arpke of Salem and Floyd Lancaster of Zillah, Wash., were married at the home of the bride's parents, Mr. and Mrs. O. L. Arpke, 195 South Twenty-third street, at high noon Wednesday, November 16. Rev. O. F. Lienkaemper of Portland, an uncle of the bride, officiating. Those who witnessed the ceremony were Mr. and Mrs. O. L. Arpke and son Albert, and Miss Amanda Lienkaemper of Salem. Mr. and Mrs. Wilbur Bush of Zillah and Rev. and Mrs. A. F. Lienkaemper of Portland.

The bridal party started on their wedding tour. They will spend several days in Portland and Seattle before going to Zillah, where they will make their home.

Friends of Mr. and Mrs. Carl Kuegel and Mr. and Mrs. S. P.

Kimball have recently heard that they expect to land in New York November 29. The party has been in Europe for two months and was to sail from Naples November 15, according to the last word received from them.

A surprise party was given for Mr. and Mrs. T. J. Clark by a group of friends Wednesday evening. It was in celebration of Mr. Clark's birthday. Those present were Mr. and Mrs. Robert Clark, Miss Mildred Clark, Mr. and Mrs. Ray Clark, Miss Maxine Clark, Mrs. Nellie Knox and James Goodrich of Durand, Ill., a brother of Mrs. T. J. Clark.

Mrs. E. Von Eschen and Mrs. Charles Sherman were hostesses for the Faculty Women's club of Willamette university yesterday at the Von Eschen home. The membership of the club is restricted to the wives of the faculty and women members of the faculty.

Following a business session and social hour refreshments were served by the hostesses.

Mrs. David Wright and Mrs. W. M. Smith will be hostesses today for the Past Matrons club of the Order of the Eastern Star. A luncheon party will be given for the club, which numbers 26, at the Wright home.

The mothers and babies of the First Methodist church, the Jackson Lee church and the Leslie church are to be guests at a Cradle Roll party at the First Methodist church this afternoon at 2:30.

CLUBS AND WOMEN'S ACTIVITIES

The Women's Alliance of Unity church will enjoy the hospitality of Mrs. J. S. Culver and Mrs. Frank Breckenridge at the Breckenridge home, 175 South Nineteenth street, this afternoon.

Requisition from Utah Is Honored by Governor

Governor Olcott yesterday honored a requisition from the governor of Utah asking the extradition of J. E. Skelton who is wanted in Salt Lake City on a charge of grand larceny, alleged to have been committed from an express company. The lad is 18 years old, according to testimony, but in his application to the company had given his age as 23, it was said, so that he might obtain work. He was arrested in Portland at the home of a sister.

SAGE TEA TURNS GRAY HAIR DARK

It's Grandmother's Recipe to Bring Back Color and Lustre to Hair

That beautiful, even shade of dark, glossy hair can only be had by brewing a mixture of Sage Tea and Sulphur. Your hair is your charm. It makes or mars the face. When it fades, turns gray or streaked, just an application or two of Sage and Sulphur enhances its appearance a hundredfold.

Don't bother to prepare the mixture; you can get this famous old recipe improved by the addition of other ingredients at a small cost, all ready for use. It is called Wyeth's Sage and Sulphur Compound. This can always be depended upon to bring back the natural color and lustre of your hair.

Everybody uses "Wyeth's Sage and Sulphur Compound" now because it darkens so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through the hair, taking one small strand at a time; by morning the gray hair has disappeared, and after another application it becomes beautifully dark and appears glossy and lustrous.

FOUR LETTER MEN ON DEBATE TEAMS

Southworth Leads Affirmative, Emmons Negative, at High School

Four letter men from the team of last year are among the six orators selected to represent Salem high school in debate for the coming season. Ward Southworth will lead the affirmative team, the two local teams, two will be selected later to participate in the debates and the others will serve as alternates.

Assignment to teams made yesterday by Coach Harry Savage gave Benoit McCroskey and Donald Warden berths on the affirmative team under Southworth, and Kenneth Perry and Charles Nunn positions on negative squad. From the three on each team, two will be selected later to participate in the debates and the others will serve as alternates.

This year Salem will be trying for the new Loren DeCout championship cup as the team last year won the first one as the permanent property of the Salem team.

In their first debate which will be held in the early part of the year, the two local teams will be debating a question of public ownership of the railroads.

NO MONEY HELD TO MEET CLAIM

Industrial Accident Commission Said to Be on Non-operative Basis

The state industrial accident commission said yesterday that it is temporarily on a basis of practical non-operation because of depletion of the commission's funds caused by over-investments in bonds by State Treasurer Hoff.

A widow's claim was approved by the commission yesterday and the treasurer will be notified to set aside the necessary reserve to produce the periodical payments to the beneficiary, but it is said that because of depletion of the fund it will be impossible to set aside the amount unless an adjustment can be made.

The adjustment proposed, according to James W. Crawford, deputy state treasurer and secretary of the bond commission, will probably be the resale of from \$125,000 to \$150,000 of the bonds which represent the state treasurer's alleged over-investment. The money received will go into the industrial accident fund and protect the segregated accident fund.

Crawford has asked Attorney General Van Winkle for an opinion on the question of whether the treasurer's office or the bond commission shall assume the responsibility of the proposed resale. Crawford believes the sale of the bonds and the replenishment of the fund can be effected within 10 days.

Myrtle Point to Add To Its Water Supply

The town of Myrtle Point, Coos county, contemplates improving and adding to its municipal water supply. An application has been filed with the state engineering department for authorization to construct a reservoir for the storage of 80 acre feet of water from John creek, a tributary of the north fork of Coquille river. A pipe line five and a fourth miles long is contemplated, and the estimated cost of the construction of the pipe line and reservoir is \$22,500.

Other applications have been filed as follows:

By the Elk City Water company Lincoln county, covering the appropriation of water from Dixon creek, tributary to Big Elk river, for domestic and municipal purposes for the town of Elk City. The water system will cost approximately \$1200.

By A. E. Brown of Crane, Or., covering the appropriation of water from Indian creek, and an unnamed tributary of south fork of Malheur river, for storage in the Brown reservoir, the water to be used as a supplemental supply for irrigating 192 acres in Harney county.

By Fred W. Perkins of Homedale, Idaho, covering the appropriation of water from Owyhee river for irrigating 37 acres in Harney county, at a cost of \$3,000.

By Baar & Cunningham, of Portland, covering the appropriation of 25 second feet from North fork of Scappoose creek, tributary to Columbia river, for domestic and industrial purposes in Columbia county, at an estimated expenditure of \$20,000.

By F. H. Somre, of Waldo, Or., covering the appropriation of 25 10 second feet from Woods creek for placer mining purposes in Josephine county, at a cost of approximately \$2,000.

By J. Edwin Johnson, of Vale, Or., covering the appropriation of water from Middle fork Malheur river for the development of 3409 horsepower, to be used in operating electric generators for municipal lighting purposes.

By William Banton, of La Grande, covering the appropriation of water from Clay Spring for irrigation of a four-acre tract in Union county.

By Mrs. Maud R. McMillan, of Newberg, covering the appropriation of water from Clover Swale creek for supplemental supply for irrigating 60 acres in Harney county.

By Gregory Pashek, of The Dalles, covering the appropriation

of water from Mill creek for irrigating three acres in Wasco county.

Visitors Are Here From Atlantic City, New Jersey

Mr. and Mrs. William M. Fort and Mr. and Mrs. J. J. Jones, of Atlantic City, N. J., have been guests at the home of Dan J. Fry in Salem, looking over the city and section. They will go on to Portland and Seattle and travel over some of the scenic highways, when they will dispose of their Reo car and go home by rail.

They started from Atlantic City on September 15, and changed only two tires in their journey from the Atlantic ocean to the Pacific in southern California. They came on salt air to salt air all the way across the continent.

They found not more than 200 miles of bad road all the way across.

They are thoroughly "sold" on the whole United States, and especially on the beautiful Oregon scenery and country and the lovely city of Salem.

Mr. Fort is a contractor. Mr. Jones is manager of the Charles restaurant in Atlantic City, where they have fed as many as 25,000 people in one day.

The visitors say that when it is fully realized that such a journey may be made with such ease across the country, and that the roads along the Pacific coast are so well paved and kept up, there will be such crowds of tourists out this way as will tax the facilities of this country to accommodate them.

New Proposals Made by Head of Morson Project

J. E. Morson, who again is in control of the Walker Basin Irrigation company, yesterday submitted to the state desert land board a proposed contract between his company and the Tumalo irrigation district whereby the Tumalo district would acquire the right of storage in Crescent lake and the Walker Basin company would agree to relinquish to the government certain lands in its segregation that would be irrigated from the Crescent lake storage. The board took the contract as proposed under advisement, referring it to State Engineer Cupper and Attorney General Van Winkle for recommendation.

"Do you drink?"
"No."
"Then hold this quart while I tie my shoestring."

ZHANSETT HEADS FLAX INDUSTRY

Expert from Turner to Have Charge of Plant at State Penitentiary

Warden Compton of the state penitentiary announced yesterday that he has secured the services of E. J. Hansett of Turner to have charge of the flax plant at the state penitentiary. Mr. Hansett to assume his new duties Saturday.

"Mr. Hansett is acknowledged to be one of the most expert flax men in the country," said Mr. Compton in making the announcement. "We had contemplated working out the balance of the 1921 flax crop into products with the present force, but inasmuch as the crop as it stands after yesterday's fire represents a great many thousands of dollars of the flax growers' money and many of them have expressed the belief that an acknowledged and experienced expert should be at the plant to safeguard their interests against loss by improper handling, I decided to endeavor to engage Mr. Hansett, which I did successfully about two weeks ago. I consider that we are very fortunate to acquire his services."

She (in a tantrum)—Absolutely! I'm going away to die. Give me my toothbrush and my powder puff.—Paris Sans-Gene.
