BISHOP TALKS OF BUSINESS STATUS

Million Dollars Worth of Building in Sight Near Sale mNext Year

In discussing the business outlook for 1933, C. P. Bishop, in speaking to the Rotary club yesterday noon, said that he was of an optimistic disposition, and therefore inclined to look on the bright side of things.

While attending a conference of prominent business men at Seattle lately, Mr. Bishop had the pleasure of hearing an address by Robert Dollar, the greatest steamship man and exporter on the Pacific coast. He quoted Mr. Dollar as saying that very few people realize how near America was last summer to another world war on the Pacific coast.

Conference Lauded—Referring to the armament conference at Washington, Mr. Bishop said that he was satisfied that much had been done in the way of modifying a world sentiment of distrust on the Pacific coast and therefore inclined to look on the bright side of things.

Regarding marketing conditions Mr. Bishop said: "The producers of our country are fast becoming organized into selling organizations that will mean more remunerative prices for the past season. The high cost of producing the crop of 1921 and the low price at which it has been marketed, has demonstrated to the farmer that grain matter must be used in selling as well as brawn in production."

Regarding the "farmers' bloc" in congress, Mr. Bishop said that it was bound to produce good results on the Pacific coast and might bring within a short time the appointment of a real dirt farmer on the director's board of the federal reserve bank.

Local Affairs Mentioned—"We have much to encourage us in our local affairs. The lumber industry is getting into an activity not known since the close of the war. The government's 168 estimate on crop prospects for the coming year is that it is to be the largest in the history of the country and fruit prices are advancing. With the fruit crop of 1921 absorbed before the beginning of the next crop year, the 1922 crop will strike a market with shelves practically bare. "One million dollars worth of building construction is in sight for next year within five miles of Salem. Hence, let us go about our labors with good cheer."
