WRITES HIS OWN EDITORIAL

R. 3, Salem, Or., Feb. 7, 1922

Editor Statesman: I am sending you the facts of an incident that happened here at Hall's Ferry yesterday. It may not appeal to you, but I believe it is a good theme for one of your common-sense editorials. Too many of us forget that is is our duty to look after the comfort of the animals of the lower kingdom; all we seem to see is man, alone. Yours truly,

OUR LARGEST UNIFORMED ORGANIZATION

Not even excepting the Army and Navy combined, the Boy Scouts of America is the largest uniformed organization in America. Twelve years ago the Boy Scouts of America was only an idea. Today there are 403,102 scouts nationally registered as members. In addition there are 35,671 scoutmasters and assistant scoutmasters. Besides these, there are more than 84,000 men serving voluntarily in other capacities-troop committeemen, members of local councils, commissioners, members of courts of honor. In addition to these there are between five and six hundred men giving full State convention of Artisans at Woodburn time professionally to the supervision and extension of the September 21, 22 and 23-Pendleton the background for an aggressive

The ruling family had at first glance the appearance of great strength. For one thing, it was unique among the dynasties then enthroned throughout the world in that it had maintained its power from the dawn of the nation's history. That, in itself, spoke for genuine kingship. Nevertheless, it was decadent, its ruler and presumptive rulers showing marked traits of insanity and utter inability to think to the quick-time of the world about them.

However, Yamagata had a new set of facts to deal with when he came to maturity. Religion was no longer Europe's chief concern Indeed, Europe took religion like she took snuff, still showily, but not seriously. Her new religion was business and her aim conquest and markets. Japan could not avoid coming into the new world; the only question was as to terms.

Yamagata was determined that she should come with her head up and raise it ever higher. The emperor saw hazily on the whole question. The people were still like cattle. In the emergency about himself and became the invisible government of Japan. That group fought out, first of all, the ssue of isolation or a world role for Japan, winning on the latter proposition. It then converted the nation into a military-economic machine, capable of prosecuting either war or business successfully.

Even Germany achieved no such combination of government and 'ndustry as Japan worked out under the genro. In no other nation in the world is businesshig and little business-so tied up and interrelated in cooperative ownership and management between the government, the ruling family and the people-the big and little capitalists and the laboring people—as it is in Japan. This combination owns and operates great and small ocean steamship lines and shipbuilding plants, railroad and street railway systems, power plants, factories, banks, etc., etc.
