tion of immigration authorities and social workers throughout the country. Judge Bingham's work is his own best rebuttal against the attacks of such misinformed radicals as "S. E. F." shows himself to be this answer is not written so much as a defense of the jurist in question but rather a brief index to his efforts in this one of the several departments of Marion county circuit court department No. 2.

During the past three years over 250 naturalization cases have been handled in this court and of this number about 220 foreign-born citizens have been admitted, while in other cases are pending. This is a superior showing when compared with the record of any other county in the state, proportion of population considered.

The writer has been present on many occasions when these classes were being examined and has been impressed by the attitude of sympathetic impartiality displayed by Judge Bingham. This attitude of helpfulness toward the foreign-born is also found in the office of U. G. Boyer, county clerk. The writer has personal knowledge of many instances where both Judge Bingham and Clerk Boyer have devoted much time in aiding individuals who, because of the illiteracy of their native land, were experiencing difficulty in passing the simple tests of citizenship.

Judge Bingham has been tireless in his efforts to elevate the foreign-born women to a position of equality with her husband. This court in Marion county is one of the very few in the United States where the foreign-born prospective citizen is required to show that his wife can speak the English language, and that she also is aware of American citizenship codes.

In articles which have been given publication in national dailies and periodicals, Judge Bingham has pointed out the menace of the alien who refuses to assume citizenship obligations although receiving and hoarding the pecuniary gains made possible to him by his "adopted" country.

In these articles, Judge Bingham has called attention to the seriousness of the situation when at various times the alien vote has been a controlling factor in the political affairs of several states. Such a vote could easily be a reflection of the policies of this alien's fatherland.

Judge Bingham has voiced the stand taken by millions of Americans when he asserts that the alien who fails to acquire citizenship and who exists only as a menace to the United States, should be deported. He suggests that this action should be taken if the foreign-born resident has failed to make sincere effort at least to take out his first naturalization papers within five years of the time of arrival in this sheltering country.

"S. E. F." brands this stand as "assassin" and throws mud on this effort to make America safe for Americans. "S. E. F." makes the following conclusion: "It is just such assinine statements as the foregoing (speaking of the five-year trial citizenship proposal) that makes the bench ridiculous in the minds of all half-informed persons."

The writer is convinced that "S. E. F." has certainly qualified as being "half-informed," and would suggest that he make a more thorough investigation before he waves his red flag again. Perhaps "S. E. F." is worried by the deportation idea. "S. E. F.'s" unfortunate venture may have aroused the curiosity of many who are not familiar with the great amount of good that is accomplished by our naturalization courts. A visit to the court room on naturalization day, during each term of court, will provide ample proof of the statements made in this limited space.
