"Coming up" is the attitude of the prune market. The Oregon Growers Cooperative association has made an advance in selling prices of prunes, from one to four cents a pound. Contract is Awarded for City of Union Section

We are better situated this year than ever before to offer to you the better values at a figure that is most reasonable in comparison with the prices attached to cheaper merchandise compared with its value per dollar invested.
It has been the policy of this store throughout its third of a century existence to interest the public in the true saving to them in buying quality merchandise. In the last few years a great many seem to have lost sight of the fact that there is such a thing as good reliable merchandise, and have given themselves up wholly to the consideration of a price.
This year we have used more care than ever before in selecting our stock. Consequently we are today showing one of the cleanest, most attractive stocks of men's clothing and furnishings ever shown in the Willamette Valley. We are going to do this year as we have ever done before, a volume of business on a "good service square dealing" basis, with good reliable merchandise at a reasonable price as the means of doing it.

THIRTY-TWO YEARS OF SERVICE
What can we say that will more clearly impress itself on your mind, of the ability of this store to serve your needs, than that we have behind us thirty-two years of continuous service, and buying experience? During that time we have handled men's clothing, and furnishings exclusive of all other classes of merchandise. We have always bought the best quality merchandise obtainable that represented the greatest value per dollar invested, and sold it at the lowest possible figure. Is not then our experience sufficient to convince you that what we handle is as it should be, of the highest value on the market, and therefore best suited to your needs?
It is the easiest thing in the world for a merchant to buy cheap merchandise and let it sell itself. We personally have never approved of that form of merchandising and consequently have done quite the opposite by buying the best values in clothing and furnishings, and sold at the lowest price possible. The greater majority of men prefer the better grades of clothing regardless of price, but our third of a century's experience has enabled us to offer you these values at that reasonable price.
We are better situated this year than ever before to offer to you the better values at a figure that is most reasonable in comparison with the prices attached to cheaper merchandise compared with its value per dollar invested.
