

# CITY NEWS IN BRIEF

**Flax Meeting Called**—Flax growers, flax weavers, flaxen-haired people, everybody who even uses linen paper money, will be eligible to the banquet at the Marion hotel Thursday night, when the realtors of Marion county entertain flax enthusiasts in the interest of the flax industry. The development of flax raising and manufacture is beginning to take hold of more and more people in this section, and the dream of a two-million-dollar linen finishing mill here in Salem doesn't seem at all an idle vision, according to the plan outlined by the flax association, and being endorsed by the realtors.

**Baby's Spine Should Be Adjusted When Necessary**

If a baby's spinal condition is neglected the defects of early life may grow into the mature body of the adult. The defects of early life, if corrected in the infant days of childhood, become the strength of maturity.

A baby's spine is the most responsive spine. The younger the patient the more easily and quickly the spine responds to chiropractic spinal adjustments. Babies are being restored to health from diseases of the head, eyes, ears, nose, throat, lungs, heart, stomach, liver, pancreas, kidneys, bowels and lower organs by chiropractic spinal adjustments.

**Marriages Fall Off**—Marrying people are taking a vacation these days. Not a single application for a marriage license has been made for four days, the last one being March 9. The torn-up condition of the clerk's office may have something to do with it, or perhaps the fact that the marriage license book finds its usual desk position right above the sign "Dog Licenses," a huge hand-made indicatory sign for the benefit of those who haven't learned where to go for these canine permits. Anyhow, the marriage licenses have gone off the market for the present.

# MAY DAY FETE PLANS FORMING

May 5 and 6 Date Fixed for Annual Event at Willamette University

## CORONATION IS FEATURE

Dramatics, Athletics and Presentation of Class Gift Included

Definite work has been begun on the May Day program for Willamette university. The celebration will occupy two days, May 5 and 6. On Friday the first day, the visiting guests will register. "Something," it isn't decided what, will be dedicated to the university; a drinking fountain, a new gymnasium, a tree, a promise, whatever looks like worth dedicating.

The old university bell will be ceremonially tolled, following a custom ages old. At 12:30, the annual students' lunch will be held on the campus, one of the biggest social events of the year.

**Addresses in Afternoon**  
The afternoon will have a few addresses, to be followed by the coronation of the May queen, and the May dances on the campus. Closing the afternoon exercise, there will be baseball on Sweetland field. In the evening the juniors put on their play, "It Pays to Advertise." They are now hard at work on the play.

Saturday morning, May 6, the first thing will be the annual May morning breakfast.

As the day warms up, the tennis tournament will be called. The two collegiat champions of the state, Noble Moodhe and Hugh Doney, graduate from Willamette this year, and a new breed of champs will have to be developed. Following the tennis, or if necessary, coincident with it, the college band and various classes of the university will put on their annual class stunts.

**Juniors Present Program**  
For the afternoon, the burning of the freshman green caps, and the reception of the rooks into the college proper, will be one of the stunts. The juniors will present their class day program, a howling farce of some kind not yet made public.

Fred Patton is general manager for the whole May day program. Waldz Zeller is campus manager, Robert Notson is manager of the Queen's Court, and Misses Mildred Brown, Grace Brainerd, Caroline Stober and Lola Millard are the committee on "Feed."

"We are planning to make it the biggest thing of its kind in the history of Willamette," said Manager Patton.

## MANY CASES OF RHEUMATISM NOW

Says We Must Keep Feet Dry, Avoid Exposure and Eat Less Meat

Stay off the damp ground, avoid exposure, keep feet dry, eat less meat, drink lots of water and above all take a spoonful of salts occasionally to keep down uric acid.

Rheumatism is caused by poisonous toxin, called uric acid, which is generated in the bowels and absorbed into the blood. It is the function of the kidneys to filter this acid from the blood and cast it out in the urine. The pores of the skin are also a means of freeing the blood of this impurity. In damp and chilly, cold weather the skin pores are closed, thus forcing the kidneys to do double work, they become weak and sluggish and fail to eliminate this uric acid which keeps accumulating and circulating through the system, eventually settling in the joints and muscles causing stiffness, soreness and pain called rheumatism.

At the first twinge of rheumatism get from any pharmacy about four ounces of Jad Salts; put a tablespoonful in a glass of water and drink before breakfast each morning for a week. This is said to eliminate uric acid by stimulating the kidneys to normal action, thus ridding the blood of these impurities.

Jad Salts is inexpensive, harmless and is made from the acid of grapes and lemon juice, combined with lithia and is used with excellent results by thousands of folks who are subject to rheumatism.—Adv.

ball college, after all. This is the best place for the institution.

A pioneer citizen told The Statesman yesterday that the new name for West Salem, which is being sought, in order to get a branch postoffice over the river, ought to be Earldale. His reason is that John Earl was the old time owner of the land over there, and for many years his farm house was the only building on that land. Besides, John Earl was a sturdy pioneer and a good man, and Earldale sounds well, too. The suggestion is respectfully passed on to the West Salmities.

"Hughes' veracity impeached by Borah" was a headline over a dispatch from Washington yesterday. Which is a joke. "It is to

Does Not Cost As Much As Mill Run

Its price is \$26.00 while the price of Mill Run is \$29.00 per ton.

**Has Superior Feeding Values**  
Notice the analysis in comparison.

An actual chemical analysis shows;

	Protein	Fat	Fibre
Albers' Dairy Feed	13.9%	4.5%	16%
Wheat Mill Run	12%	2%	15%

Protein is the essential factor in determining values of feeding stuffs. Protein makes milk. Reckon fat as energy values. Fibre is waste. Therefore buy protein and fat.

A moderate amount of fibre is necessary to give bulk or keep the meals apart.

Albers Dairy Feed is palatable because it contains molasses, with Mill Run, oat by-products and cocoanut meal. The mixture in Albers' Dairy Feed supplies the variety needed by the dairy cow. It is better than Mill Run at the same price.

We offer it at less.
