#### THE FARMER'S PROSPERITY DEPENDS UPON HIS HOME MARKETS

Milo D. Campbell, president of the National Milk Producers Federation, has written a letter to Chairman Fordney of the above heading, that has many remarkable statements in favor of the immediate enactment of the protective tariff bill now before Congress

And the following are a few of the high lights:

"No man can be for a protective tariff and for foreign valuation as a basis for tariff duties at the same time. They won't mix. We cannot open our gates to the pauper labor of the world, whether that labor comes to us walking, or in boxes and erates.

It should be clearly understood that every specific duty is now based on American valuation. Nobody questions the justice of this basis. But, when we begin to suggest an American basis for ad valorem duties, the importers see ghosts of departing profits they have been realizing for a hundred years, secured by fraud and by the impossibility of our officials to execute the law.

"About the farmer's market centers the problem of the nation's prosperity or decay. Our exports in 1921 were greater in tonnage than in 1920, while in dollars they dropped nearly one-half.

"Foreign markets for our surplus are an illusion, while the home market may be absolutely assured by keeping our dollars at home and paying them out to our own workmen.

"The big thing that should interest the farmer right now is a market where buyers have enough money to pay him a fair price for his products, and that market is right here at home and nowhere else.

"Millions of factory employees are idle, and this foreign valuation plan if continued can only be interpreted as idleness for more of them.

"Congress has just extended for another year the limitation of foreign immigration to this country. By that limitation no country can send to us immigrants in excess of 3 per cent annually of the number it already has of its people in the United States. Such limitation is a wise one.

But it would be far better from the fa to admit them, if the only alternative shall be to admit the products of their pauper labor at pauper wages upon its foreign valuation. If they were here, they would be eating our food and increasing our market. But God forbid that we shall bring such a calamity upon our own workmen!

"There should be some board or commission, or, the President himself should be clothed with authority to adapt the rates

within limits to changing needs.

"Along with the manufacturers are 30,000,000 mouths to be fed and along with the importers not a mouth in America but their own.'

Mr. Campbell makes many other points that should have the consideration of the members of the two houses of Congress,

weeks, had the bill ready a year ago-

And when every day of delay has meant that much time lost these things are great handicaps. in placing the business of the United States on the firm basis that every consideration under high heaven insistently demands and has been all along demanding, upon which it should have

in character, already having branch associations in New until the movement bids fair to become nation-wide.

The organization has no dues or assessments. Its pure and all men.'

"All members agree to make the Golden Rule, 'Do unto others as you would have them do unto you,' fundamental tor. As some join church organiations solely for business in their relations with one another and with all people."

"Loving service shall be the keynote of our commercial ambition, rather than personal gain.'

"The scope of this association shall be the commercial relations of the whole world, to the end that uniform prosperity, efficiency, equity, honesty, justice and fair dealing selves free from the dry rot of indit ference and the poison of of the American jests are on shall be established everywhere and in every relation in life."

Finally, it is declared, "The teaching of Jesus, as given in the New Testament, and as revealed by the Spirit of Truth promised by Him, 'When He, the Spirit of Truth, is come, He shall guide you into all truth,' shall be our guiding light.'

There can be no higher business ethics than these; and if they could become the actual rule of conduct of a majority of the business men of the United States, the effect upon our business life not only would be wonderful, but their influence would be profoundly felt in the individual and collective life of the whole nation. May these associations spread until every city in the land has one embracing a large membership, and may they be loyal to the purposes set forth in their organization declarations.

If these ethics could come to be the actual, daily rule of conduct of even a large minority of the business men of the United States, they would do more to banish profiteering and destroy the profiteers than any law, national or state. No profiteer could long stand the competition of a body of men actuated by the determination to carry out in body of men actuated by the determination to carry out in secretary of state.

their business activities the spirit of the Golden Rule. This in Salem.

April 16 to 23—"Better Music" week im Salem.

amy has been discarded, but the would be true of every city, as well as of the whole country. If these associations could become nation-wide and the ideas of their organizers, as expressed in their articles, could become a real, living actuality in the business activities of their members, a commercial millennium would dawn upon the country.

Why should not every business man make these ethics the constant and uniform rule of his business life? The man who does this will carry about with him a sense of selfrespect and an inward satisfaction much more valuable than any ill-gotten gains. An approving conscience is infinitely more valuable as a possession than any amount of goods or money or bank deposits without it.

More than this, the spirit of Christ and the teaching of the New Testament actually brought into one's business and loyally obeyed will pay, not only in these higher ways, but they will pay in money. Irrespective and independent of now about to take up the protective tariff bill. He declares that any organization, the intelligent business man who will the American consumer gets little or no benefit from the low steadfastly make them the rule of his life cannot fail to priced goods imported; that they are sold over the counter for ultimately reap a rich financial harvest. In any legitimate ust enough under American made goods to secure a sale. He and useful occupation a reputation for honesty, efficiency, in one paragraph: "How any American with a sense of equity and fair dealing are the best assets that one can

## TO FORD OWNERS

Of all the developments in more recent years the success of the Ford has perhaps played the most far-reaching part in its effect upon both the social and industrial life of the . United States. So deeply has the Ford and its uses become embedded in the structure of our daily lives that we take for granted, as a mere matter of course, the almost boundless convenience

But the car is incomplete without FORD SERVICE, and an immensely intricate system has been built up from the original inventive thought from which it sprang. This whole system, the logical outcome of an infinite volume of experience, rests upon one fundamental principle:

### A Successful Ford Agency Is One That Renders Good Service to Ford Owners

The Ford Motor Company insists upon its Agents recognizing this statement as an axiom, and writes its Agency contracts accordingly, that is why, in a city like Salem, there is only ONE FORD AGENCY, and that Agency is backed by the whole force and resource of the Ford Motor Company's organization. Ford Service means nothing more nor less than taking complete care of the Ford Owners needs, so as to insure their well-being and their comfort. To do this adequately and willingly is the Valley Motor Co's duty to its customers, and a pleasure to its Man-

The Valley Motor Co. has recently undertaken some changes with the special thought in view of improving its service, and building up its good-will with Ford owners.

Come in and talk with Mr. W. L. Phillips, the new General Manager; you will find that he is a great believer in friendly service, understandingly offered to the Company's customers. He will tell you of some changes around the shop that will improve the service; and his ideas about the stock of parts, accessories and tires, and such things. And he will tell you about the steps that have been taken to shortly give us the best Gasoline and Oil service station in the City of

Mr. F. L. Wagar is Sales Manager, and although he is quite modest about himself, you will not find him at all bashful in telling you what his Company can do for its friends. And the Company has started a Garage, with day and night service. The garage is intended to be a convenience to those who want to have their cars taken proper care of, by the day or by the month, with a shop and a skilled force of mechanics on the premises.

The Company has just incorporated, under the Laws of Oregon, with Mr. Paul B. Wallace as

Valley Motor Co.
