In provisions, the outcome was unchanged to 15 cents

According to reports given out today by unofficial authorities, adopted by the Common Council the condition of the winter wheat crop appeared to be around 79 per cent, as compared with 76 in December last. Estimates of the probable yield varied from 550.-000,000 to 580,000,000 bushels, against December estimates of 527,000,000 bushels. With such figures current, and with milling and export demand slow, the market readily took a downward course, especially as Liverpool quotations showed weakness and there was continued moist weather in the domestic winter crop

> Lack of support for wheat viaues was particulraly apparent near the end of the day. All the active deliveries closed at the bottom prices of the session.
