

CITY NEWS IN BRIEF

Prospects Lined Up—
Virgil Anderson, forensic manager at Willamette university, has succeeded in getting several good prospects lined up for interclass oratory. The senior and junior classes have several members wearing Bar-W's won in the field of debate. In the freshman and sophomore classes there is good material from which to develop some good varsity debaters and orators. From the material shown by the interclass tryouts the forensic manager expects to have some additional debaters in the field for next year.

What Of the Morrow?
Hundreds of us can live happily today, with never a worry or care, but what of the morrow? Really, the only happy men are those who can live today looking forward to the tomorrow when they know they will in all probabilities be as fit as they are now. Have your eyes taken care of TODAY and know you can look forward to a happy TOMORROW.

But the Bible is true when it says, "what shall it profit a man, to gain the whole world and to lose his own soul?" There are some cities that may be good places to do business in, but not fit to live in. They have neglected the spiritual side, and no temporal prosperity can make up for the loss.

"If we will make of these two, the temporal and the spiritual, a composite vision, Salem will be a good town, a town that must continue to grow. It ought to have its city doors. And now abideth faith, hope and charity (which is love); and the greatest of these is love." Love is what builds a city that is good for homes, a city where people want to live.

"And it isn't worth while to wish, and hope, and pray, unless you do some good hard work. That builds cities.

"Progress must have direct, definite channels along which to operate. Cooperation with every activity that makes for good, is the secret of every development. No man can build any great thing alone. It takes them all to put it over. Billy Sunday was right when he told of some men who wear out 10 pairs of hold-backs to one pair of tugs. It is up to every man to help make his town better. Scenic, industrial, climatic, and every other advantage helps, but it is the men and their visions who build cities that last."

NEW DRYING METHOD TRIED
H. A. Woods of Dallas to Tray Prunes With Vacuum System This Year

DALLAS, Or., April 10.—(Special to The Statesman)—A new process of drying prunes known as the Vacuum system will be tried out by H. A. Woods, one of the prominent prune growers of Dallas this year. Mr. Woods has just returned from a trip east and while there inquired into the prune market which he found was becoming more normal than it has been for years. Mr. Woods will soon commence the construction of a dryer capable of drying between 150 and 200 bushels of prunes a day. Last year Mr. Woods sent a quantity of prunes from his big orchard east to be dried by the vacuum system and

DURYEA TELLS NEEDS OF TOWN
Staff Member of State Chamber of Commerce Noon Lunch Speaker

M. J. Duryea, of the Oregon State Chamber of Commerce, spoke before the Commercial club, at luncheon, Monday, in a striking address that he brought here by urgent request, after it had been given before a number of other Commercial clubs of the state. It was on the general subject of "Catching the Vision."

Among other things, Mr. Duryea said: "There are two visions that the community wishing to live, must catch. The first of these is the development along temporal lines. No city ever was built by natural laws. It was the product of industry and collective endeavor, that builds everything that man uses. The second is spiritual; not, however, meaning exclusively relig-

found that they dried much even-er and retained a greater amount of the juices than those dried by the old hot air system of drying such as is now in use by most of the dryers in this state. In addition to retaining the juices the vacuum system does not break down the cells of the fruit which thus insures them a better keeping product and one that will stand long shipments to foreign countries much better than the hot air dried fruit.

Wholesalers in the east declare that they can put Oregon vacuum dried prunes on the market at a price as high and possibly higher than the California product which is mostly sun dried or dried in the same way as the Oregon prunes are now dried.

Mr. Woods is very enthusiastic about the new process and believes that it will revolutionize the prune industry in the Pacific states.

Mrs. Blunder had just received a telegram from India. "What an admirable invention the telegram is!" she exclaimed, "when you come to consider that this message has come a distance of thousands of miles, and the gum on the envelope isn't dry yet."
