PACKER ACT IS HELD AS VALID

Stockyard Regulation Constitution According to U. S. Supreme Court

WASHINGTON, May 1.—The packer and stockyard regulation act of 1921, which was put through congress largely through the efforts of the agricultural bloc, was held constitutional today by the supreme court.

Declaring the stockyards are not a place of rest, or final destination, but a throat through which the current flows and the transactions which occur therein are only incident to this current from the west to the east and from one state to another," the court described the livestock business conducted in the yards as interstate in character.

Congress, in the act, "treats the various stockyards of the country as great national public utilities to promote the flow of commerce," Chief Justice Taft stated in delivering the opinion of the court, "and assumed that they conduct a business affected by a public use or a national character and subject to national regulations. That is a business within the power of regulation by legislative action, needs no discussion."

The law was challenged by certain commission merchants and dealers in the Chicago stock yards which brought separate suits in an effort to restrain the secretary of agriculture from enforcing the law.
