When Medical Men Say "Chiropractic"

Sunday Health Talk No. 49— BY O. L. Scott, D. C.
When medical men advise chiropractic is when the history of the case is one that indicates an obviously spinal cause for the ailment. Usually the case has an accident history. The sickness followed a fall or a severe strain of some kind which directly affected the spine.

But the fact about the spine is that it must pivot every motion of the body. In the living body it is a thing of utmost flexibility, and the twenty-four joints making up the three principal divisions of the spine are all movable and easily disordered by the every day activity of life. It is not necessary to suffer a severe accident to displace a joint of the spine, and when this happens it causes disease in the organ thus deprived of a normal amount of nerve impulse.

UNCLES BEN SAYS: "Watch your health. Nervy, and save your money, because the older you grow the more you will find that you have to be your own Santa Claus."

PHYSICIAN SAID TRY CHIROPRACTIC

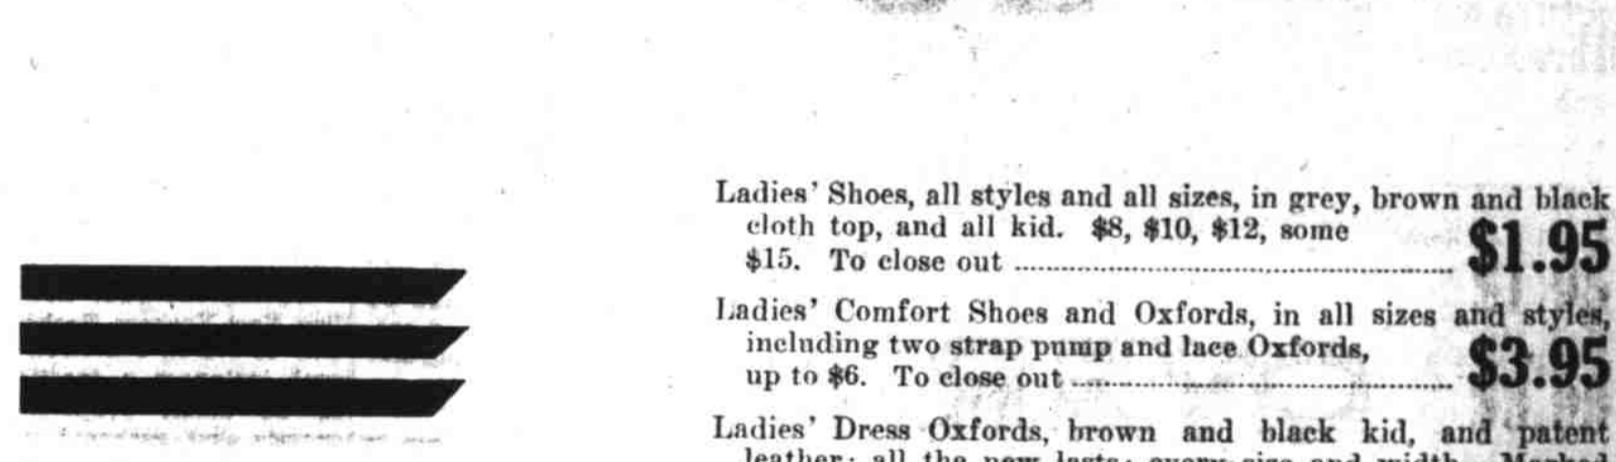

"I fell from a scaffold to a cement sidewalk. During the following eight years I consulted any physician whom I thought might remedy my condition, but relief was only temporary. In 1917 paralysis came as a result of the original injury and my physician said medicine could not help me and referred me to a chiropractor. I had been in bed five days unable to move when I received the first adjustment. After the third adjustment I was able to get up and walk to the office, a distance of two miles. From then on my recovery was steady and after six months of adjustments I was permanently cured." — Fred Eberhart, Chiropractic Research Bureau, sworn statement No. 13208.
