First Prize—Twin Cylinder Harley-Davidson
Motorcycle

The Harley-Davidson Motorcycle

The Harley-Davidson is a good machine, fast and powerful, embodying original and exclusive features, and backed up by a guarantee from the manufacturers.

It has a high duty motor, with speed to burn, a world of power, flexibility never before attained in any gasoline engine, the very climax of ingenuity and efficiency, and a re-designed frame, strongly reinforced to handle all the strains incidental to side-car use.

These, with a number of important improvements, like the marvelously compact automatic oil pump, and the new and highly efficient muffler, puts the Harley-Davidson in the front ranks in motorcycle productions.

The Harley-Davidson is not the result of a solitary inspiration or idea. It is a development, the direct result of nearly twenty years' production of great engineers. Skilled mechanics, the finest specialized artisans in the world, have finally produced this wonderful motorcycle, a machine which is an ingenious blending of good material, good design and good workmanship.

Evidence of the satisfaction that the Harley-Davidson machines have given is found in the large number of machines in constant use and giving continued satisfaction.
