

There will never be an end of the gunman problem until pistols are taken away from everybody and the manufacture and sale of the weapons are placed under drastic federal restriction. Under the law nobody is allowed to car-

ry a revolver without a permit, but anyone can buy one so that the class that ought to be deprived of guns is sure to be well supplied.

The love of happiness is the root of a great deal of evil.

Pearly teeth—combat the film tonight

There is a way to prettier teeth, and millions of people have found it.

It consists in removing the dingy film. You see the results everywhere on teeth you envy, maybe. And those glistening teeth are often one's premier attraction.

This offers you a ten-day test, to show how whiter, cleaner, safer teeth may also come to you and yours.

Film clouds the teeth

Your teeth are coated with a viscous film. You can feel it with your tongue. It clings to teeth, enters crevices and stays. It forms the basis of dingy coats.

The tooth brush used in ordinary ways does not end it, so nearly everyone has suffered from that film.

It is the film-coats that discolor, not

the teeth. Film is the basis of tartar. It holds food substance which ferments and forms acids. It holds the acids in contact with the teeth to cause decay.

Germes breed by millions in it. They, with tartar, are the chief cause of pyorrhea. Thus most tooth troubles are now traced to film.

Now you may combat it

Dental science has long been seeking a daily film combatant. Now two effective methods have been found. Able authorities have proved them by many careful tests. Leading dentists, nearly all the world over, now advise their daily use.

A new-day tooth paste has been perfected, to comply with five modern requirements. These two film-combating methods are embodied in it. This is the
