Built in 1900, at the time of the Paris exhibition, from the plans of an American engineer whose name it bears, the gigantic wheel has afforded pleasure and amusement to hundreds of thousands of Parisians and foreign visitors, young and old.

Advance in Gasoline Is Not Yet Expected

In the five years since R. C. Suelling came to take charge of the Associated Oil for the Salem district, the business has made a number of surprising shifts.

In 1917, October was the company's bannaer month for the year, In 1918, August was the busy gas months; in 1919, September saw the peak of the gas consumption; in 1920 and again in 1921, the big month of the year was July. The average peak

month consumption is close to 100 three times the smallest month Mr. Snelling say that there

seems to be nothing in the rumer of an advance in price for gas. The storage oil left over from last winter seems to be sufficient in quantity to insure off for every the surplus. It is the practice to fill the enormous storage tanks during the winter, when the demand is less than the supply, and then in midsummer, when the de-PARIS, June 14.—Americans mand exceeds the supply of the reduce this reserve to a panic

possible use, without endangering French Woman Claims Ability to Lift Tables Though Novel Seance

> PARIS, June 14.—(By The Associated Press) -- Professor Charles Richet of the Institute of France and the academy of medicine and his two colleagues appointed by the faculty of sciences of the Sorbonne to investigate spiritualism and the trance phenomena of mediums are achieving some curious results.

Their work thus far has been confined to seances with Madame Bisson, a medium well known among the spiritualists of western Europe. Sir Arthur Conan Doyle has had sittings with her. She is one of the few mediums reputed to exude viscous liquid from their finger tips under trance conditions.

An Unknown Substance.

The professors had been told that this liquid, dripping onto a plain surface, took strange forms of faces. They have not had that result yet but have made other singular discoveries. The medium's hands, while in a trance, were held at some distance from a table, and the liquid dripping from the finger tips, they say, formed into slender sticks somewhat after the fashion of stalactites. When the union was established between the finger tips slender rods, the medium could would disgraec Tammany or any hua this month. raise the table from the floor ap- other political organization." parently without the exertion of

some of these rods have been analyzed chemically, the professors report, revealing that they contain no substances not contained in the human body.

The committee of professors, under instructions from the facalty of sciences, must not disclose any details of their findings until their inquiry has been com-

North East West South

Supposing that, beginning tomorrow, all the newspapers are discontinued. What a furore the public would make. "News! News! We must have news or we will be no better off than the ancients," "All right, suppose we give them news but cut out the advertisements."

Then we would discover that politics, the doings of society, notices of fires, accidents, deaths, scandals, sports, the activities of the police and criminals add little or nothing to the real comfort and happiness of this greatest age in the world's history.

What genii are they that have crowded the last fifty years with so much of advantage to humans? They are legion in number, but not least among them is Advertising.

Our day is the greatest time the world has seen because we have more to be happy with better things, greater variety, greater comforts gathered together from the North, East, West and South for our choosing and selection. Look about you. This is the day of better food, better homes, better clothing, better babies, better health, better business. And advertising is the instrument that makes these better things possible.

Windship Company

Advertising is the NEWS of all the looms, of all the furnaces, of all the laboratories, of all the shops, of all the stores, of all the world and all working for you,

Because of advertising, luxuries and necessities that once cost a king's ransom are yours at little prices. Advertising pits merchant against merchant, artisan against artisan, producer against producer, for your benefit, forcing out the best there is in everything and telling the world about it.

Read advertising. Keep abreast of today. Advertising furnishes you with facts and opportunities that you would otherwise never know.
