## "THERE CAN BE NO MIDDLE GROUND"

"There cannot be such a thing as a non-partisan tarifi in the United States. This is because there are in this country two schools of thought which differ fundamentally and radically as to the proper functions and scope of a tariff. First, a school which believes tariff should be written merey for the purpose of providing revenue; second, a school hich believes that in addition to providing revenue, tariff should be used as a medium for protecting American industries and keeping out destructive foreign competition. There and can be no middle ground between these two positions, Thus writes a well known Republican authority in the

National Republican.

But he is mistaken-For while there can be no middle ground between these two positions, there can be a non-partisan tariff.

The one about to be written now will be largely suchapproved by very considerable sections of the Democratic

The tariff question is a business question. It should have never been a political issue. Some of the archaic leaders of the Democratic party persist in trailing it along as a political issue; merely for political purposes.

But the great body of that party, especially in the South is growing tired of such political monkey business.

Let the raising and lowering of tariff rates be left to the Johnson for high crime sand mis-President, as has been proposed, or to a commission, as is demeanors memory must have done in England and France, and the tariff as a political been busy with the Los Angeles issue will soon be as dead as Julius Caesar-

And it should be, for the good of the whole country; ev- in the days of Cornelius Cole in ery section of it, and every man in it.

### P. T. BARNUM'S TRIBUTE TO ADVERTISING

Gamaliel Bradford, writing in The Atlantic Monthly for great reason for him to come July about P. T. Barnum, says: "It will not be disputed home. He might as well loaf on elevate the police, lend them that the greatest element in Barnum's success was advertist the job until he is succeeded by ing. The rapid development of journalism in the last half C. C. Moore.-Los Angeles Times. them with ambitious aspirations. of the nineteenth century made it pre-eminently the age of If he will save it, and do it quick- exalt them in public respect and publicity, and few human beings have ever lived who enjoyed ly. The Statesman will apologize inspire them to greater virtue. publicity, or understood it, or profited by it, more than Bar- to him for all the mean things it num did. He recognized this himself at all times. In 1855 has said and copied from other

Fully appreciating the powers of the press (to which more than to any other one cause I am indebted for my success in life), I did not fail to invoke the aid of printer's ink.' "Twenty years later he declared: 'Without printer's ink, ering from his recent illness, but

I should have been no bigger than Tom Thumb.'

"By unfailing, unblushing proclamation of the merits of been forwarded from Washington. ences by which selected delegates his goods he drew the whole world about him; and so enormous was the force at his command that even he did not appreciate it fully. On one occasion he remarked: 'I lost a try surrounding Salem, he sees manifold problems involved in large amount of money that day by not having sufficiently every once in a while a farm their work and the task of preestimated the value of my own advertising."

"Every agency of direct, paid publicity was, of course, ing apparatus for the radio. This the nation as a whole. These delset constantly to work, with all its resources of flare and will become common within the egates would be the men who litter. Once convinced that he had something worth public course of a few years. In a few have won rank for intelligent and

attention, he did not hesitate to arouse that attention by all that printing and painting could devise."

Here are wo paragraphs from the current weekly financial letter of Henry Clews, the Wall Street authority: "From all parts of the country come favorable reports concerning business activity. There has been a large percentage increase in the production of copper, and in fact of all non-ferrous metals, while the recent growth in steel and iron production, already so well known, has continued to go forward. A resents the arrival of a period of recovery in this branch of greater daring of all kinds of going and connecting everybody business. Exports are also increasing in a good many staple lines, the proceeds of recent large foreign loans in this market being used to pay for purchases. . . . . The favorable development of the various crops throughout the country still proceeds, and private reports concerning the prospects of cotton are even more hopeful than had been expected a week or two ago. The reports from the Northwest as regards structive ability it might have. grain also indicate the probability of an even better production than had been forecast."
