

CITY NEWS IN BRIEF

This Dog Bites— According to a complaint filed yesterday at police headquarters, there is a bitzy dog at 610 South Fourteenth street, that is liable to gnaw off a leg or a neck or anything, if the passer-by gives it a fair chance. The complaint asks to have the dog restrained, muzzled, chained, tanned, or its teeth smoothed off, like a well-habituated bear.

Reward for Teachers— Marion county teachers who send in their monthly reports on time and in good order are to have a new form of award that may be worth real money to them in their subsequent contracts. The county superintendent plans to issue to those who do this work right a certificate of merit that would be almost as good a recommendation for any school board

as a college diploma. There are about 140 school districts in the county, and out of these there are enough incorrect reports that require a lot of official checking and correspondence to straighten out, to make it seem a worthwhile effort to bring about a uniformly good system of reports by rewards that have a real value.

Mr. Lindsay was to have been here last spring but owing to the death of his mother was unable to come. Many have expressed a desire to hear him give readings of his poems and it is anticipated that Waller hall will do no more than accommodate the audience for the occasion.

After showing him the whole prune business, from the scions in the nursery to the money in the till, he is going to take the English cousin out to the seashore, where the silversides are running in the coast stream, and give him a chance at real Oregon salmon such as never were seen in England.

Nuts Coming In— Walnuts are already beginning to come in to the local handlers, one of these being the Oregon Growers' association that handles the crops for its own members. The nuts are usually dried in the prune or hop driers though at a much more moderate heat. The heat that would properly cure a prune, would turn a walnut into an oily, rancid product that the market wouldn't touch. The crop promises well, and the nuts are of excellent quality.

Rostein, Anderson and Timme Lucky Hunters

They took the first car, about 4:30, out to their hunting ground, 4:30 cars out to their hunting grounds out near Marion, and when the slaughter was all over had 36 ducks of various sizes and kinds, and one wild goose. The string of victims was hung up in front of the Anderson & Brown store Monday, to tell the world that Oregon is still in the hunting ring and that the hunter can get something in return for his license if he'll go where there are. This is the finest single string of game brought into Salem this fall, but it is by no means the only one. Some other good shooting

PRINCESSES AND DUCHESSES WAIT ON TABLES.

Mrs. Lila E. Harper of Montgomery, Ala., escaped war perils in Greece by coming home aboard the Themistocles. She tells of the hardships of the daughters of royalty, with their court gowns serving as waitresses' costumes, and their lily white hands roughened with labor. But for 25,000,000 gold francs Mrs. Harper might still be marbled in Greece, with the perils of war increasing daily about her.

China pheasant season opens Oct. 15th, and the gun-shooters are 'furbishing up their arms in anticipation of a good year. It is not anticipated that the bird crop will be abnormally heavy, but there are nevertheless enough of the beautiful birds to make it always interesting for the shooters. A few English partridges are to be found that give the shooters about the severest test of all the feathered game. They are not legal game, however at least at this time. These birds were 'planted' in the valley a number of years ago but have never succeeded very well. They seem not to approach the Chinas in hardihood and adaptability.

S. P. Denied Authority To Remove Hugo Depot

Through an order entered yesterday by the public service commission the Southern Pacific company is denied authority to move its depot at Hugo and is required to maintain the depot in its present location. The order comes out of a petition filed with the commission by the residents of the community objection to the proposed removal to a site about 2600 feet north of its present location. The company claimed the removal was necessary to avoid the expense of starting trains on a grade. The commission found that the main operating difficulties are in connection with the delivery of train orders and that this may be remedied by the construction of a new building for the use of the telegraph operator at an expense that will be less than moving the depot, and that the convenience of the public will not permit the moving of the depot around which the community of Hugo has been developed.

Upon the return of Senator La Follette to the senate he will find an active movement to displace him from the leadership or near- leadership of important committees to which his seniority would otherwise entitle him. But Wisconsin likes La Follette, trusts him and approves him. And that is the business of Wisconsin.
