The dignity of the home calls for a piano. If the piano corner in your home is still unfilled let us show you how well and upon what favorable terms we can fill it.

An artistic piano is vastly different from the ordinary kind. It is true that in general appearance pianos are similar, but in details there will be found varying qualities from the "tin pan" variety up to the piano that has that satisfying quality that even the musically uneducated detect at once. The beautiful singing quality of tone and evenly balanced scale proclaim the artistic piano. Don't measure the cost of a piano altogether by the price you pay. The permanent satisfaction it will give, the quality tone it possesses and will possess after years of use, and the amount of repairs it will then need are important points.

Sherman Clay & Co. have spent years in careful, painstaking selection of a line of pianos which will measure up to these standards—which fact is reflected in their thousands of satisfied customers up and down the entire coast.

Player Pianos from \$395 up

If you have a straight piano which is standing idle, let us look it over and make you an allowance on a player piano.
