Tuesday evening they hold the definite birth-

day celebration in the house, warming they are to give to the Prof. Thomas Roberts home at 505 North Summer street. Music and refreshments and the company of the all the lady Kiwanians, will make it a real celebration. ### Flogs Democratic Administration and Points to Republican Progress

SAN FRANCISCO, Nov. 6.—Secretary of Labor James A. Davis, who is in San Francisco on a campaign tour of the west tonight issued what he termed an "eve of election" appeal to voters over the nation to elect Republican senators and representatives in tomorrow's elections.

The statement follows: "In the short 18 months since the Republican administration under President Harding took charge of the affairs of the nation at Washington we have brought America back from the brink of industrial and commercial disaster and started on the high road to prosperity.

"Industrial Panic Averted—"When the Democratic administration ended we found between five and six million working men walking the streets of our towns and cities, seeking in vain for employment. Mine, mill and factory was closing down under the system of laws and taxation which was rapidly driving industry to the wall. By some legislation enacted by the Republican congress and by wise administration we have halted the movement toward industrial panic and have already entered upon an era of prosperity.

**Finance Rehabilitated**—"Today the five or six million who were then unemployed are back at work. Industry has revived until today the demand for labor exceeds the supply. The finances of the nation have been rehabilitated and the Liberty bonds held by the patriotic citizens of the country have been brought back from 85 cents on the dollar to par. The federal tax bill has been reduced by \$800,000,000. An American protective tariff bill has provided security for the operation of American industry and agriculture. The farmers of the country have been aided through the War Finance Corporation and under the agricultural credits bill by government funds which enabled them to tide themselves over a period of ruinously low prices which were brought on by a Democratic policy of financial deflation that safeguarded no one.

**Support Appealed For**—"These things have been accomplished in a year and a half and the work is just begun. The administration in pursuing its policy of rehabilitation needs all the

support the American people can give. Now is the time to vote the Republican ticket from top to bottom and to send to Washington senators and representatives who will take an active part in the constructive work that lies before the administration.

"To elect a democrat at this time means to elect a minority officer whose sole function will be criticism and obstruction. The administration has earned support for every Republican candidate.

## American Palates Infallible

Like many popular delusions, is the prevalent opinion that certain foreign nations surpass the people of the United States in knowledge as to the proper selection and serving of food. While it is true that certain chefs, and justly famous, are of foreign extraction, no race of people are so particular about their food or live as well as the American Nation.

It is surprising when the facts are disclosed by investigation, how infallible is the palate of the American public. Invariably the best flour, the best bacon, the best cereal and the best coffee is always the best seller. The average citizen cannot be misled in the selection of food and the manufacturer who offers a better quality than his competitor is on a sure road to general recognition. Advertising has little to do with the final result, it merely hastens the day.

The fact that Hills Bros. Coffee has for many years led all other brands in volume of sales is a source of much pride, because it demonstrates that the majority of people can, and do, appreciate quality, and are quick to place the stamp of their approval on the goods of a manufacturer producing a perfect product.
