

CHINESE TARIFF RAISES REVENUE

Schedule Drafted by International Commission After Six Months

SHANGHAI, Dec. 2.—China's new tariff schedule drafted by an international commission that was in session in Shanghai for six months and designed to fix an effective 5 per cent ad valorem tariff, will go into effect December 1 with the proviso that all goods consigned to China, shipped and en route before December 1, shall be permitted to enter the country under the old tariff schedule.

It is estimated that under the newly fixed schedule China's revenues will be increased by between ten and twelve million dollars, Mexican, a year.

The revision of China's tariff is in accordance with the program laid down at the Washington disarmament conference. Following the tariff commission conference that was held in Shanghai, another commission is to sit, probably early next year, at Peking, with the purpose of effecting a further increase of 2 1/2 per cent. Eventually, according to the program, a final 5 per cent increase of the country's tariff is to be brought about, being authorized when like—the term applied to inter-provincial duties—is abolished.

The final increase, according to estimates, will considerably more than double revenues over the annual total returned under the old schedule, even if no considerable increases in the country's foreign trade develop.
