

IDENTITY OF KLUXER GIVEN

Witness Twines Net of Evidence About Newt Gray, Murder Accomplice

BASTROP, La., Jan. 18.—(By the Associated Press.)—Testimony as to the identity of one member of the masked band which on August 24 kidnaped Watt Daniels, T. F. Richard and several others was offered today at the open hearing being conducted here today by the state of Louisiana into the activities of hooded men in Morehouse parish. The mutilated bodies of Daniel and Richard were found several weeks ago floating on the surface of Lake La Fourche. Pathologists reported the two men had been tortured to death before their bodies were thrown into the lake. Other members of the kidnaped party have testified to having been flogged by the kidnapers.

Third Degree Prohibited
Fred Eubanks testified he was held up by masked men on the Bastrop-Mer Rouge highway that evening and that he recognized Newt Gray as a member of the party.

Much of the testimony both yesterday and today centered about Gray and his counsel stated certain questions put to him while on the stand Tuesday and Wednesday bordered on the "third degree" variety. Judge Fred M. Odum ruled that Gray need not answer any question that might tend to incriminate him.

Rufus Eubanks today testified that he had been asked by Gray to drive Gray's family car, as Gray wanted to stay in Bastrop to attend to some business. Eubanks said that Gray drove the machine out on the Bastrop highway and turned it over to him at or about 2000 yards from where Daniel, Richard, W. G. Andrews, "Tom" Davenport and J. L. Daniel were kidnaped. He said Gray got out of the machine about half hour before the kidnaping occurred and that he drove back to Bastrop to pick up Gray's family and took them home.

Gray One Abductor
Fred Eubanks, who testified that he had known Gray well for more than four years and resided within half a mile of Gray's home, told of being held up on the Bastrop highway near where Rufus Eubanks said he had dropped Gray.

He said the kidnapers wore black hoods and named Newt Gray as one of his abductors.
Rufus Eubanks, recalled at the afternoon session and questioned concerning his drive from Bastrop, said he passed Thomas Higginbotham's car on the highway and that Higginbotham was alone.

Dean Ashcraft, field manager of the Station Carbon company at Spuyker, in the course of his testimony made the first statement tending to establish an alibi for T. J. Burnett, former Morehouse deputy sheriff, now under arrest on a charge of murder in connection with the deaths of Daniel and Richard.

Ashcraft was a boarder at the home of Burnett at Spuyker. Burnett, he said, had attended the baseball game and barbecue in Bastrop on August 24 and returned to Spuyker before 7 o'clock that evening. When Ashcraft saw him, Burnett had donned his working clothing which were kept in the bath house. The fact that Burnett had them on, he said, was proof that he already had been to the plant.

Parlie Rogers, New York watchman at the Carbon plant, also was among today's witnesses. He was identified during the latter part of last week by Harry Neels, former Bastrop garage man, as having, with T. J. Burnett, held him up on the Bastrop-Mer Rouge road August 17.

Rogers was questioned concerning the kidnaping of Richard on August 17. He denied having been with Burnett at any time on the Bastrop-Mer Rouge road and only knew Richard when he saw him on the streets of Bastrop.

Rogers admitted he was a kinsman and while he did not know Watt Daniel personally, he had heard reports that Daniel was a "bootlegger" and "gambler" of which he did not approve.

FRANCE SEES SERIOUSNESS

(Continued from page 1)

and the motion to suspend the parliamentary immunity of Cachin was voted.

BERLIN, Jan. 18.—(By The Associated Press.)—Official quarters here were without information late tonight with respect to the execution of the French threat to cite Fris Thyssen and other industrialists before military courts because of their refusal to obey the orders of the allied economic mission. The Ruhr situation, in general, as viewed at government headquarters, appears to be far from clarified. The impression was gained that the French were not making any tangible

headway in their attempted enforcement of reprisals.

It is believed here that sharp intervention in the Rhine traffic will result in the complication of all coal transportation by water, as it is thought the shippers and sales agents will not risk having cargoes seized. Attempts by occupation authorities to influence the organized railway workers also are reported to have foundered on the stubborn refusal of the men to recognize the French authorities.

Coal shipments to points outside the occupied ones, it was reported tonight, continue of normal volume with a slight increase.

The league of German industrialists today addressed a congratulatory message to Fris Thyssen commending him and his fellow industrialists for their attitude of resistance.

ESSEN, Jan. 18.—Five prominent mine directors appeared before the French authorities at Eredney today and after iteration of their refusal to aid in the delivery of coal, were advised to hold themselves in readiness to appear before a military court.

A policeman was arrested for not saluting a French officer.

MAY EXTEND USE OF AIRPLANES

Patrol Used in West May be Adopted by Large Cities to Hunt Fires

CHICAGO, Jan. 19.—(By The Associated Press.)—The airplane patrol used in the west to detect and fight forest fires may be adopted by large cities to hunt out dangerous fire zones and insure their correction and the elimination of fire hazards.

The Underwriters Laboratories, maintained by the fire insurance companies to test and approve fire prevention and safety devices, is investigating the possibilities of airplane photography.

By means of an airplane map of a large city, fire hazards which escape notice of the casual observer on the ground become apparent, according to officials of the laboratories. The maps are made at a height of at least 10,000 feet to eliminate distortion of the parallel lines, which occurs in pictures taken at low altitudes.

The maps are useful for fire departments in studying the condition of roofs, skylights, lumber yards where the typography is constantly changing, and the condition of back yards and vacant lots, particularly where refuse heaps or box and lumber piles may constitute a fire danger to adjoining buildings.

Major A. R. Schroeder, former holder of the world's altitude record and now in charge of the aviation section of the laboratories work, has discovered numbers of fire hazards in his own flights over Chicago.

The proposed airplane maps will supplement the usual insurance broker's maps, which show by the use of various colors the material and type of construction of every building in a given section. The present maps, the laboratories point out, fail to show fire dangers from stored materials or refuse in open spaces adjoining the buildings.

One New York lumber company has already adopted the idea and furnishes airplane photographs of its yards to the insurance brokers once a month, so that, in case of fire, the actual condition of the yards will be available, in case of controversy.

GET LAW VIOLATORS

Judge G. E. Unruh fined two traffic violators who appeared before him in the justice court yesterday. Ira Leighty, charged with speeding pleaded guilty and was fined \$25. Lucius Short, charged with operating a truck with no mirror, was fined \$15, and was given until Saturday to pay the fine.

State traffic officer Bloom arrested both men.

MODERN YOUTH LIVES EASY

"Hurry up" Yost Would Have Coming Generation Developed by Football

CHICAGO, Jan. 17.—(By The Associated Press.)—American youths in too many homes of the nation live a life of luxury and spend too much time on the soft, easy cushions of automobiles, in the opinion of Fielding H. Yost, coach of the University of Michigan, who, today emphasized the value of football in developing "that unconquerable fighting spirit so badly needed in our American life."

Develops Determination
Playing the popular college game will cultivate the qualities of determination, persistence and courage, the veteran mentor declared, that can nowhere be better learned than on the gridirons. Coach Yost believes that football, as well as other athletics, should remain a contributing factor of college training, as the sport will enable collegians to become better fitted for their careers.

"This is the one virile American game and it is needed badly in our American life," Coach Yost said. "The benefits are derived not only by the thousands who play the game, but by the many more thousands who witness these contests. Our boys in too many homes live a life of luxury and ease and spend too much of their time on the soft easy cushions of automobiles. What they need and must have to fit them as men—real men, are the very things which are taught and developed on the football field, a strong alert body, a keen, quick thinking mind and that unconquerable fighting spirit which overcomes all obstacles in the end."

Good Money Getter
"Athletic games are generally recognized as a necessary part of our national school and college life."

"The critics of college athletics, especially football, suggest that we should have less football, or none at all, and promote athletics for everyone. What have these men done and what are their experiences in establishing, financing and putting across such a voluntary program? Those in charge of intercollegiate athletics, through the funds obtained largely from football, have financed and developed a broad intercollegiate and intramural athletic program, based on voluntary participation."

"Boys go to college to obtain a better education and to become better fitted for life. Football, as other athletic activities, is and should ever remain, a contributory factor to this main object of college training. It should not be made an end in itself for then it loses much of the ordinary benefit that is usually derived from it."

Learn Loyalty
"This difficulty can be eliminated by arranging schedules so as to cause players to miss as few classes as possible, by limiting the length of practice periods and by seeing that the schedules of the season do not extend over too long a period of time. All football schedules should close by Thanksgiving Day. At the same time these boys will learn to sacrifice themselves to a group or institution for the attainment of a common goal, which means that they will learn co-operation, team play, loyalty and service. Likewise, they will cultivate the qualities of determination, will power, persistence and courage, both moral and physical."

"Even those who do not participate learn the lessons of service and loyalty which permeates the student atmosphere as a result of football."

WATERHOUSE SENTENCED

J. J. Waterhouse, arrested on a charge of rustling a cow and selling it to a local packing company, was indicted by the new grand jury which was drawn yesterday, pleaded guilty and was immediately sentenced by Judge Percy Kelly to serve two years in the Oregon state penitentiary.

CHINESE GIFT TO PRESIDENT.

The Rev. Father William Joseph Cahill, missionary at Kaiting, China, and aanel of silk needlework which he presented to President and Mrs. Harding as a gift from Chinese children in the Convent of the Little Helpers of the Holy Spails in Shanghai, China. The panel is the work of the children.

YESTERDAY IN WASHINGTON

President Harding, still confined to his room with an attack of grippe was reported much improved.

American merchandise exports during 1922 were valued at \$3,831,516,735, compared with \$4,485,031,356 in 1921 and \$2,484,018,292 in 1920.

Italy, it became known here, believing the Ruhr situation to be fraught with danger has urged France to consider carefully the advisability of taking any further steps to forcibly collect German reparations.

Compared with 1921 totals, gold imports during 1922 decreased \$416,078,512, the commerce department announcing increases, however, of \$12,983,517 in gold exports, \$7,563,982 in silver imports and \$11,231,887 in silver exports.

After announcing that future negotiations regarding funding of Great Britain's embassy the British debt commission left for New York preparatory to sailing for home Saturday.

The department of labor reported that the general level of wholesale prices for December while practically the same as in November, represented a 1 1/2 per cent increase over the Dec-

ember 1921 average, form products leading with 20 3-4 per cent.

Harry F. Sinclair, testifying at the senate oil investigation denied the right of the committee complete records of his company's, the Hyva corporation, a private investment concern and the committee issued a subpoena for them. Previously he had testified that Teatop Dome lease imposed obligations of \$60,000,000 on him.

GOVERNOR TO PRESIDE

Governor Pierce will preside at the mass meeting of Salem citizens which will be held Sunday in the First Methodist church, in the interests of the Children's farm home at Corvallis. Judge Walter Evans of Portland will talk and matters pertaining to the campaign will be taken up.

LAVISH DINNERS IN ENGLAND GONE

Boiled Beef, Cold Ham, Apple Tart, Etc., Now Said to Make Fine Meal

LONDON, Jan. 1.—Luxeous and dinners at the House of Lords are surprisingly frugal. The setting where the legislative nobility of England congregates and the ceremony attending so many of their functions stimulate the imagination of visitors, who expect to find the members of the House of Lords lunching lavishly at midday and sitting down to elaborate and formal dinners at night.

On the contrary. The lord chancellor recently gave a political dinner, a cheap affair, for when the total of the check was divided by the number of guests, it worked out at the rate of six

USE SULPHUR TO HEAL YOUR SKIN

Broken Out Skin and Itching Eczema Helped Over Night

For unsightly skin eruptions, rash or blotches on face, neck, arms or body, you do not have to wait for relief from torture or embarrassment, declares a noted skin specialist. Apply a little Mentho-Sulphur and improvement shows next day.

Because of its germ destroying properties, nothing has ever been found to take the place of this sulphur preparation. The moment you apply it healing begins. Only those who have had unsightly skin troubles can know the delight this Mentho-Sulphur brings. Even fiery, itching eczema is dried right up. Get a small jar of Rowles Mentho-Sulphur from any good druggist and use it like cold cream.—Adv.

What kind of a Battery is in your car, John?

"I don't remember, Bill—had it CAMEL-test a year ago and haven't looked at it since!"

Now You Can End Your Battery Bothers

Camel Battery Solution is a chemical discovery which takes the place of water in storage batteries. When installed, it forms a heavy paste which will not evaporate nor spill. You need never add water, your battery terminals will not corrode, and your battery will last longer and give better satisfaction. Discharging does not harm, and overcharging is impossible.

Briefly, this solution does three important things, any one of which saves more than its small cost. They are these: 1—Prolongs the life of a battery. 2—Eliminates danger of ruining battery by neglect—makes it practically "forget" proof. 3—Actually makes battery more efficient.

CAMEL BATTERY SOLUTION

ANY authorized battery service station can install Camel Battery Solution for you in 30 minutes. When CAMEL-ized, your battery is just as efficient as the other parts of your car and you pay no attention to it. Lengthens the life of your battery at least 25%—eliminates all danger of ruining your battery through neglect. Camel Battery Solution does not harden or liquify—it remains the consistency of a heavy paste, is a perfect conductor and does everything that water will do in your battery, but does it more efficiently. It entirely eliminates the washing effect of water upon the plates. This feature alone eliminates a great deal of wearing and prolongs the life of the battery.

- 1 NO ACID TO SPILL—A CAMEL-ized battery can be turned on its side, or upside down. It will not spill or leak.
- 2 NEVER NEEDS WATER—Many batteries are ruined through failure to add water. A CAMEL-ized battery needs no water. It is neglect proof.
- 3 PREVENTS PLATES BUCKLING—Whenever the water in a battery gets below the level of the plates, buckling of the plates immediately sets in and a great deal of resistance is created, which means an excessive amount of heat, which in turn causes the plates to buckle.
- 4 NO CORRODED TERMINALS—Corroded terminals are caused by slopping of the acid. Because there is no acid to slop and spill, Camel Battery Solution absolutely prevents corroded terminals.
- 5 NO LEAKY JARS—Many a battery has been ruined by jar springing a leak, allowing the acid to drain out. Because of its consistency Camel Battery Solution will not drain out, even if the jar is badly cracked.
- 6 NO FREEZING—This is an important feature in cold weather. A CAMEL-ized battery is "frozen" proof.
- 7 CAN'T BE OVERCHARGED—You don't need to turn your lights off your battery a CAMEL-ized battery. It is impossible to overcharge. Never does overcharging harm a CAMEL-ized battery.

Radio Users
Have Camel Battery Solution installed in your batteries. They will be absolutely noiseless and you will have no acid to spill on clothes, furniture or carpets.
