THE OREGON STATESMAN, SALEM, OREGON

Representative Would Have ast Action on Tax Remittance Project.

Chagrined because two bills for e relief of Astoria have been id in the ways and means committee without final action since early in the session, Representative Mott of Claisop county late erday afternoon moved to have one of the bills reported out of the commission without recom-mendation and lablich the table. When he made this motion, Moit uncorked a volume of pro-test from house members of the committee, but gained the assurance of Chairman Fletcher that 'if possible"' the two original billis and a substitute bill introduced Tuesday night by residents of the stricken city, would be reported out this morning.

On this assurance Mott withdrew his motion but announced that he would renew it today if the bills were not forthcoming. Mott assured the house that he

was not trying to force the hand of the committee, but explained. that since congressional action is desired and only twenty days of the congressional session remain, it was necessary that prompt action be taken. He told, the house that he had the pledged votes of more than two-thirds of the house membership to support his bill h would remit to Astoria all which would retain years, to apply on a bond issue that would permit the reconstruction of about one-third of the destroyed public

Combat the Film Tonight Watch how your teeth improve

Go get this free tube of Pepsodent and make this delightful test. Millions have already done that. The glis-

tening teeth you see everywhere now show the results that come. Start now to fight that film on teeth. Do.

It to be dainty, to be safer. Do it because dentists the world over advise it. Do it for your sake and your family's sake. Learn what this method does.

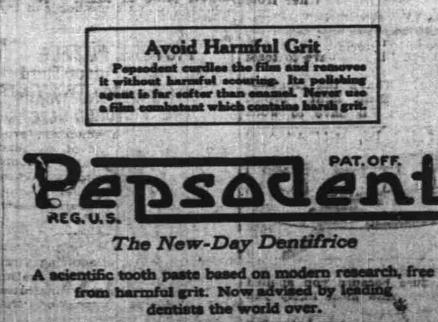

Film-your great enemy

Film is the great tooth wrecker-that viscous film you feel. It clings to teeth, enters crevices and stays.

Food stains, etc., discolor it, then it forms dingy coats. Tartar is based on film. Those

thin coats dim the luster of the teeth. Film also holds food substance which fer-ments and forms acid. It holds the acid in contact with the teeth to cause decay. That's why tooth troubles were almost university Germs breed by millions in film. They, with tartar, are the chief cause of pyorrhes, now so alarmingly common.

Two new discoveries Dental science has in late years found two

ways to fight that film. One acts to curdle film, one to remove it, and without any harmful scouring." ""

Able authorities proved these methods by many careful tests. Then a new-type tooth paste was created, based on modern research. These two film combatants were embodied in it for daily application.

That tooth paste is called Pepsodent. Care-ful people of some 50 nations now employ it, largely by dental advice.

Other essentials

Other effects were found to be essential. So Persodent multiplies the alkalinity of the saliva. That is there to neutralize mouth acids, the cause of tooth decay.

It multiplies the starch digestant in saliva. That is there to digest starch posits which may otherwise forme

Thus Pepsodent gives manifold power to these two great tooth protecting These combined results are bringing world over, a new conception of class
