## CUSTER MASSACRE HISTORY COMING

Narrative of Lieutenant Bradley to Be Published By Society

HELENA, Mont., April 27.—A narrative of the Sioux campaign of 1876 in which occurred the Custer massacre, written at the time the fighting occurred by a participant in it, will be published this summer by the Montana Historical society.

The narrative is from a manuscript record by Lieut. James H. Bradley, who was a member of the Seventh United States infantry stationed at Fort Shaw, a few miles west of what is now Great Falls, Mont., when it was ordered to the valley of the Big Horn river to meet the Seventh cavalry under General Custer and several other detachments. Its arrival was a few hours too late. Several thousand Indians had overwhelmed Custer's force and were gone before the other troops arrived.

Lieutenant Bradley was stationed in Montana, at Fort Benton and Fort Shaw, from 1871 until he was killed in the battle with Chief Joseph, the Nez Perce leader, in the Big Hole basin, in what is now Beaverhead county, Mont., close to the Idaho line in 1877.

Lieutenant Bradley was a prolific writer and filled a dozen manuscript books with data on the early days of Montana, Indian habits and customs and accurate accounts of the Indian warfare of the 70s.

After Lieutenant Bradley's death his manuscript records were bought by the Montana Historical society in 1881, from his widow, who lived in Georgia. Excerpts from them have been published by the society and the vol-

### Extensive Short Coverings Carry Number of Leaders Up Five Points

NEW YORK, May 8.—Indications that the stock market had been oversold by professional speculators for the decline were seen today in the quick recovery from recent weakness of several popular industrial stocks. Buying of these issues by so-called inside interests in the early dealings, resulted in extensive short covering which carried a number of the leaders one to five points above yesterday's closing prices. Bear traders made another last hour attempt to unsettle the list by throwing overboard a large volume of domestic oil shares. Equipments led the initial rally.

Strength of rail shares was accompanied by reports of several voluntary consolidations being announced in the few months and increased demand for these securities.  
Call money opened at 4 3/4 per cent and dropped to 4 1/2 in the early afternoon, closing at that figure. Trading in the time money market was quiet with occasional loans arranged at 5 1/4 per cent for the shorter maturities. There was a good demand for commercial paper, prime names being unchanged at 5 and 5 1/4 per cent.  
Demand sterling created a new low for the year at 4 1/4, off 1/2 cent. French francs improved slightly to 6.63 cents. Exchanges in other currencies were narrow and irregular.  
FRUIT  
NEW YORK, May 8.—Evaporated apples easy; prunes easy; peaches dull.

## FREEZING WEATHER IS AID TO GRAINS

### Pronounced Firmness of Stocks and Cotton Also Has Influence on Price

CHICAGO, May 8.—Freezing temperatures with snow and rain in the spring crop belt together with pronounced firmness of stocks and cotton, led to higher prices today for grain. The government crop report issued after the close turned out to be a little less bullish than was looked for. Wheat closed steady at 1 to 1 1/8 not advanced, July \$1.17 1/4 to \$1.17 3/8 and September \$1.15 7/8 to \$1.16. Corn finished 1 and 1/8 to 1 and 3/8 cents, up, oats up 1/8 to 5/8 cent, and provisions showing a rise of 2 1/2 cents to 10 cents.

Throughout the day, persistent buying of future deliveries of wheat took place, chiefly on the part of commission houses and said to be more or less on European account. In this connection, significance was attached to the fact that the Liverpool market had failed to respond fully to yesterday's decline here and that Liverpool quotations were at more than twice the premium over Chicago that they were a while back. There was gossip current, too, that all the bonded Canadian wheat in the east had been sold to go abroad and that Europeans would have to be more liberal buyers of cash wheat hereafter.

The unseasonable weather for wheat in the northwest was somewhat offset by beneficial rains in Illinois, Indiana and Ohio, on the other hand expectation that the government crop report would prove advantageous to the bulls but was an evident help toward restoring a higher price level, during the last part of the exchange session.

Large shipments of corn out of Chicago tended to strengthen prices of corn and oats. Storms and cold acted as a further-bullish influence. Provisions ascended with grain.

It is figured out that in this country 2,000,000 automobile owners will buy new cars, passing the old ones over to others, this year. This ought to add much to the spread of profanity. —Exchange.

## Wobbly Strike Is Near End on Pacific Coast

SAN FRANCISCO, May 7.—The general strike called by the Industrial Workers of the World, April 25, is about at an end in the Pacific coast states, according to reports received tonight. The loggers and longshoremen in Washington voted to return to work. At San Pedro, Cal., 1200 longshoremen went to work on 50 steamers. Shipowners reported the men returning to work rapidly and the plan to import workers had been held up. A letter of the IWW in eastern Washington was quoted as saying the men have been ordered to return to work and "strike on the job" by slowing up production.

## SULPHUR IS BEST TO CLEAR UP UGLY, BROKEN OUT SKIN

Any breaking out or skin irritation on face, neck or body is overcome quickest by applying Mentho-Sulphur, says a noted skin specialist. Because of its germ destroying properties, Mentho-Sulphur has ever been found to take the place of this sulphur preparation that instantly brings ease from the itching, burning and irritation. Mentho-Sulphur heals eczema right up, leaving the skin clear and smooth. It seldom fails to relieve the torment or disfigurement. A little jar of Rowles Mentho-Sulphur may be obtained at any drug store. It is used like cold cream.—Adv.
