

FORMER SALEM MAN DIES AT SANTA CRUZ

W. W. Morley, Fine Type of Citizen, With Many Friends in Two States

W. W. Morley, a former well known Salem citizen and business man, died at his home, 92 Barson street, Santa Cruz, Cal., at 4:30 on Wednesday afternoon last, July 11.

William Walter Morley came to this country from London, England, when he was a young man, settling on a farm at Frankfort, Kansas, with his mother and father. He lived there until the death of his father when he went to California with his other for a short stay, afterwards coming to Salem, where he engaged in the hardware business.

In 1905 Mr. Morley went to Santa Cruz and married Mrs. Eva Nevins, bringing her back to Salem where they made their home for two years.

Sixteen years ago Mr. and Mrs. Morley went back to Santa Cruz where Mr. Morley invested in real estate and had lived there since. A man of sterling character and

beloved by all who knew him, he will be mourned by a host of friends in both California and Oregon.

The son of Mr. and Mrs. Joshua Morley, Walter Morley was born in London, England seventy-one years ago and is survived by his wife, Mrs. Eva Morley, a step-son, Earle S. Nevins of Oakland, Cal., a step-daughter, Mrs. J. A. Zeller of Stockton, two grandsons, L. S. Nevins of Oakland and Earl S. Zeller of Stockton, a cousin, Mrs. C. D. Mulligan of Santa Cruz, her daughter, Mrs. Merle Wilson of Montague, Calif., and C. D. Mulligan. Mr. and Mrs. Mulligan lived in Salem for a long time, and Mr. Mulligan was associated in business here with Mr. Morley.

LIVESLEY NEWS

LIVESLEY, Or., July 14.—The neighborhood picnic held on the Fourth of July by the Sunday school was a great success. After a bounteous picnic dinner the crowd was divided into two groups—reds and blues—for the afternoon. These groups participated in different contests. The first was an indoor baseball game in which nine from each side were chosen. The second was a volleyball game, and after this came races of various kinds, and finally a tug of war. The red side came out victors.

Carpenter brothers are busy harvesting their loganberries. Mrs. A. Bradburg and daughter Florence, who have been camping at Quimby, have returned home.

Wallace Moore visited with his mother in Salem Friday.

Mr. and Mrs. E. P. Prescott and nephew, Leo Purvine, of Salem, visited Mr. and Mrs. Jay Cook on Friday.

Mr. and Mrs. J. L. Bishop of Stillwater, Okla., visited for several days with Mrs. Alice Coolidge and Mrs. S. L. Spurrier. While here they took a trip up the Columbia highway.

J. P. Bressler is marketing his early peaches.

NEW CORPORATIONS

The Home Beautiful Service, Inc., of Portland, capitalized at \$1000, filed articles of incorporation here Saturday. The incorporators are George H. Green, L. C. Prohaska and William H. Erashear.

Articles also were filed by the Davies Balanced Piston Valve company of Portland, capitalized at \$40,000. The incorporators are F. C. Davies, Floyd Mott and Thomas F. Burke.

OLD ELDRIDGE RANCH DEFENDED

The Petition Submitted to Board of Control With Reference Thereto

F. E. Bethea, owner of the "old Eldridge ranch," which has been offered to the state, along with other sites submitted to the board of control as suitable for the proposed new location for the boys' state training school, yesterday submitted to the State in the hands of the board of control in reference to this farm, asking that it be published. This request was made on account of an attack in a local publication—hinting and claiming that there is something crooked behind the offer of this site to the state for the purpose named, which Mr. Bethea, on his own part, resents, and the implications and charges he also denies and resents as to the other persons named and referred to by hint and insinuation. Without taking any part in this matter, the Statesman complies with the request by publishing the petition, as follows:

The Petition to the Board "To the Honorable Board of Control, State of Oregon, Salem, Oregon—Honorable Sirs: We the undersigned petitioners having in mind the welfare of the State of Oregon and its institutions respectfully petition your honorable body to give earnest and careful consideration to the following facts concerning the merits of the "old Eldridge ranch" now owned by F. E. Bethea, for Oregon training school purposes.

Location—Twelve miles north of Salem on the Salem-Champo road, 1 mile west of Concomly on the Oregon Electric railroad. Also on the east bank of the Willamette river.

Adaptability—This is one of the very best farms in Marion county, having 50 acres of cleared upland, and 15 acres of upland timbered for fuel purposes. There are 400 acres of river bottom, 315 acres of which is clear and the balance 85 acres timbered.

Soil—We are thoroughly familiar with the crops that have been taken from the soil and know them to be good. The amount and quality of the crop or crops taken from the soil we believe to be true representative manner of ascertaining its value.

Health—The community is known to be very healthy; one of the boundaries of the farm being the Willamette river, which will assist sanitation and take care of the sewerage problem.

Economy—The price per acre, \$110, is reasonable, and in view of the adaptability of the farm for the purpose, having the location, soil, drainage, irrigation if necessary, and river for sewerage, we strongly recommend this farm—with affirmation to the honorable board of control that the foregoing is true.

Supplementary Water Pumper for Silverton

SILVERTON, Or., July 14.—(Special to The Statesman)—At a recent meeting of the city water commission a contract was entered into which will provide Silverton with a single stage DeLaval centrifugal pump. This is to be used only as an auxiliary to the present gravity system in order to insure safety against any give away in the system now used. The pump delivers 1000 gallons of water per minute which would amount to 1,440,000 gallons per day.

Divorce Decrees Signed by Judge George Bingham

Two women and one man received divorce decrees signed yesterday by Judge George G. Bingham. These were Cairus M. Mills, Mirable L. Suklis and Charles E. Earls.

Custody of Glenn Mills, 14, was given to Cairus Mills in her separation from David J. Mills. She charged abandonment. The couple were married in North Carolina, January 21, 1900.

Restoration of her maiden name of Mirable L. Suklis in her complaint against Pete S. Suklis. The couple was married in Portland November 22, 1919, and he deserted on March 18, 1921, according to the complaint.

Because his wife is said to have used vile and profane language in the presence of their minor daugh-

ter and friends, Charles E. Earls was divorced from Lavina Earls. In addition to the use of improper language, Earls charged that she associated with men and women of bad repute, among them a man who had been convicted of contributing to the delinquency of a minor and two others now awaiting trial for the same offense. In order to help make things miserable for him, Earls declared that she used to punch a hole in the gas tank, simply to annoy him. They were married in April, 1918.

THE FLAX PULLER WILL PULL FLAX

There Will Be Eleven Machines in the Fields by the Last of Next Week

The flax pulling machine invented by Joe Bartosz was tried out on the P. E. Thomason place near Turner yesterday afternoon. Mr. Thomason told the reporter over the phone that it worked better in the ripper flax than it did in the green flax on the Bartosz place on Friday; and he said that he believed they would make it go all right.

H. O. Tenney, the manufacturer, told the reporter in Salem last night that Mr. Bartosz and himself had found out that the engine used was not strong enough to handle the bundles properly. The machine pulled all right yesterday, but it did not bind to their satisfaction. It is a five horse power engine. Mr. Tenney went to Portland last night, and he will send up an eight horse power gasoline engine tomorrow. It will be set to work for the season's run on Tuesday. It will not stop till the flax harvest is over.

Will Be Eleven Machines—Ten more machines will be finished this week, and they will all be ready to go into the fields by next week, if enough flax is ready for them then. They will all have eight horse power engines for binding, of course—though it will be necessary to dispose of the ten five horse power engines that had been arranged for.

Mr. Tenney says he will run 16 hours a day if necessary, and thus each machine can handle 10 acres of flax a day.

He expects to fill all his contracts—to pull all the flax there is to be pulled in the Salem district this year.

If there are no miscalculations, the end of flax harvest will be reached much sooner than could have been possible by hand pulling.

Dr. Dan A. Poling Will Preach in Salem Today

Dr. Dan A. Poling, associate president of the United Christian Endeavor societies, has been visiting with his parents, Dr. and Mrs. C. C. Poling, for several days and will preach this morning at the Cottage Street Evangelical church.

Dr. Poling came to Oregon from the Christian Endeavor convention in Des Moines. He will climb Mt. Hood with a party early this coming week and Friday morning will leave for New York city where he is pastor of Marble Collegiate church.

He will be accompanied back to New York by his son, Daniel, who came to Salem this spring from Arizona with his uncle, Paul Poling.

Dr. Dan A. Poling was in France during the war and visited Oregon three years ago following his return. Dr. and Mrs. C. C. Poling have only been in Salem for about six months.

GRADE CROSSING MOST MENACING

New System Is Tried Out in New York for Protection of Careless Drivers

Commissioner Frederick Stuart Greene of the New York State Commission of Highways has directed the use of a distinctive method of marking pavement at all approaches to railway crossings which merits the attention of every similar organization in the United States, according to American Automobile Association officials.

Approaching the tracks from either direction of the highway the automobilist will first be confronted by two wide parallel stripes painted one foot wide and placed five feet apart. These stripes will stretch clear across the pavement and will be placed 230 feet from the nearest track. The second guard against carelessness will be a third warning stripe also one foot wide painted 125 feet from the nearest track.

The third and last chance given the driver to save himself will be a final warning in the shape of a signal two feet wide painted with white and black diagonal bars similar to the markings on railroad guards and it will be located 25 feet from the nearest track which if the driver is not running beyond the legal rate of speed will give him an opportunity to stop before crossing the track.

"The grade crossing is one of the most menacing dangers that confront the motorist today," declares M. O. Eldridge, Executive Chairman of the A. A. A., "and the American Automobile Association is heartily in sympathy with any movement that tends to warn the automobile driver of his approach to one of these crossings. Commissioner Greene has taken a step in the right direction and we hope to see other highway officials follow his example."

BITS FOR BREAKFAST

The flax puller will pull. It will also bind; it did last year, with an eight horse engine.

The try-out Friday and yesterday was with a five horse power engine. But that is not power enough.

There will be eleven pulling machines, and they will all have eight horse engines to do the binding. Mr. Tenney, the manufacturer, says he will be able to harvest all the crop, and do it in

much shorter time than could be accomplished by hand pulling.

The 100 tons of loganberries in cold pack must go to the bakeries for pies. Who has another scheme to handle the rest of the crop?

The hospital drive must go over. Salem's reputation as a first class city is at stake.

A Portland lady wrote to the mayor the other day, inquiring when the band would give a concert and the electric fountain would play. She said she wanted to be present.

Parties drive here from Albany, McMinnville, Silverton, Stayton, Woodburn, Gervais, Hubbard, Aurora, and all the rest of the surrounding towns, to attend the band concerts and see the fountain, and hundreds telephone in from the country, who want to know the days and hours, so they can come and do their trading and attend the concerts.

A well known Salem man says we do not make enough of our band concerts and our electric fountain. He says "Pap" Waite and Mrs. E. M. Waite, from their places in glory land, if they can look down on the happy crowds on hand concert evenings, must be delighted at the pleasure they helped to give, by providing for the electric fountain, from the savings of long and laborious and joyous and useful lives in Salem.

American Games Played By Young 'Chinese

NEW YORK, July 13.—Chinese schoolboys playing baseball on the lot, or lining up for football practice in the school yard, would probably make an unexpected picture with which to replace our American fancies of oriental children.

No More Grey Hair or Dandruff

That's what thousands of men and women are telling their friends. The false appearance which gray hair gives and which handicaps one socially and in business, has been banished and the blight of dandruff removed by the truly wonderful tonic—NOURISHINE. This scientifically compounded tonic feeds and nourishes the hair, prevents its falling, promotes its growth and pleasantly, harmlessly restores to original color whether black, brown or blond. Cleanses the scalp. Unfailingly removes dandruff. One bottle usually is effective. No matter what you have tried—try Nourishine—today. Price \$1.25 per bottle all dealers, including J. C. Ferry.

Nourishine Positively Not a Dye

Children in always staid and decorative poses.

But these are the games which Chinese boys do play, more than any others, according to Dr. Hou-Ki-Hu of Nankin, China, who is studying in this country on a fellowship of the International Board of Health of the Rockefeller Foundation. As part of his field work toward obtaining the degree of Doctor of Public Health from Johns Hopkins University, Dr. Hu is now engaged in making a study of the work of the American Child Health Association, a national organization working for the improvement of methods and standards of child health care, with a staff of health and educational experts engaged in research and practical demonstration throughout the country.

"Before American games came with the Americans into China," Dr. Hu says, "Chinese children did not play—at least not in your sense of play. My grandfather and my father did not play games and the games I learned when I was a boy in school were American sports."

"Little girls in China used to sew and learn household tasks, but they had no active games. Now Chinese children play like children in this country. They have learned how in the American schools, and through American workers who have brought your kind of play to the children of China."

What Would You Do?

(No. 12.)

John Smith bought a team of horses, for which he paid \$200 cash, and gave his note for \$100 for the balance due. The person who sold the team transferred the note to you. When you go to Smith to collect the note, you find that the team has never been delivered, and he refuses to pay you. Would you be able to force Smith to pay this note?

Just another practical problem that our students come into contact with in their regular daily work. We plan to give our students training to meet ACTUAL incidents in business life. New classes in all subjects started a short time ago. Write or call for information.
