## Ancient Japanese Fort To Become Modern Park

TOKIO, July 21.—Several of the ancient island forts, upon which Tokio and the bay towns depended for their defense in rays long past, are to be turned into parks. These islands were built by the government and guarded the entrances to Tokio and Shingawa, adjoining the capital, and, while in later years the guns with which the forts were manned might have withstood an attack, modern guns have made them quite useless for defensive purposes.

## Foreign Ports Are Cold To Stranded Sailor Men

HAVRE, France, July 21.—Unhappy American seamen in large numbers, who carelessly or ignorantly sign faulty articles of employment on foreign vessels, are finding themselves stranded here without any hope of getting back home. In many cases jobless and penniless sailors have been arrested as vagabonds and thrown into French jails and, according to their stories, the same danger threatens them in a number of other foreign ports.

There has lately been a disposition the sailors say, among foreign steamship lines operating between Europe and American ports to bring American seamen to Europe and drop them, either through false representation or misunderstanding on the part of the men when signing the articles. In some instances the men are careless and sign in a casual way, hardly knowing or caring what

they do. Some sign for a port thinking it means a round trip, and then find themselves stranded on foreign soil. Finding they have no means to return to America, many of them appeal to the American consulates. But nothing can be done for them except in cases of men holding seamen's cards in the American Merchant Marine.

The Y. M. C. A. at Havre has helped out a number of men, but the appeals have become so numerous recently that the Association has reached the limit of its funds for such purposes.

## Ruhr Germans Shun Trains That Are Run by French

ESSEN, July 21.—Germans in the Ruhr, passively resisting in French, declined to ride on trains run by Frenchmen. Hence it

soon became a question of stay at home, as find some other means of locomotion.

They did the latter, and today the Ruhr is filled with people on rollers. Tens of thousands of laborers have bicycles, motorcycles,

or a small coaster propelled by a gasoline motor to go to and from their work. Hundreds of thousands of others are taken to their places of employment and back by motor trucks furnished by their employers.
