SALEM AN EDUCATIONAL CENTER

The Salem Slogan pages of last Thursday stressed the idea that there is business in beauty; that the "City Beautiful," which is Salem, will be the city big and prosperous—

And this week it is just as proper to stress the idea that there is cash in culture; academic learning is an asset; university urbanity stands for utility; there is position in polish; success in schooling-

And there can be no well rounded growth in any city not equipped with the best possible educational advantages; scholastic, industrial, commercial.

By these tests, Salem is in the line of growth; in the track of greatness.

There are many other tests; but these are among the most important.

DID YOU KNOW That Salem is an educational center of great and growing importance; that this city is the home of historic Willamette University, larger now than ever before, with an addition during the past year of a million dollars to its endowment fund, \$350,000 of which was contributed by the General Education Board (Rockefeller), besides a quarter of a million dollars added to its building and other funds; that all our other educational institutions are growing substantially; that this city is becoming widely known as a music center and as such is attracting students from all over the coast; that we have a splendid system of public schools, and the people have voted bonds for \$500,000 in order to provide additional buildings and facilities as fast as the growth of the population shall demand; and that this growing reputation as an educational center is one of the great business assets of Salem, which was born a school town and has made progress as an educational center throughout all its history?

formed the tremendous gap be-

tween the common school and the

Good Private Schools There are several incidental or private schools in Salem, that contribute much toward the educational primacy of the community. The parochial school has a considerable attendance, and is well conducted towards the end of giving broad, liberal schooling. There are no kindergarten schools in Salam; rather strangely, too, for the whole community tendency is toward starting 'em early and keeping 'em everlastingly at their books. But the primary grades of the public schools take the children at so tender an age, that a kindergarten system seems su-

But always the first s'art comes perfluous. The Capital Business College has been a Salem institution for The Salem schools have always 30 years; most of this time under the same management, with Prof. been of a high class since the first days of private subscription W. I. Staley at its head. It has turned out armies of capable acschools before the day of univercountants and business specialists sal education. The state capital who have gone out to conquer the was located here before the Civil war; Salem was still only a strugworld of business and of trade. No school in the northwest stands gling little village when the preshigher in point of achievement. ent capitol building plans were There were pessimists Business men write or wire in, back in the '70's, who declared 'Send me one of your graduates,' that it was an utter waste of monwith the assurance that whoever ey to build so large a capitol goes out with the Capital seal of

schools of music in Salem; some are only private teachers' efforts, Such, and Will Continue an Educational Center-The but others are really competent musical colleges, qualified to give certificates. Salem has always been a musical center, and good instructors gravitate here as soldiers fall into step at the sound of the bugle or drum. The Apollo club, the Willamette May Festival association, the Salem Symphony orchestra, and other local organizations, are shining lights in the musical world of the north-

> is the one big thing in the Salem educational system. It has no municipal or state connection, and is in the financial sense etirely apart from the public consideration. But because it is supported so largely by the individual people of Salem, and because so many people of Salem are so intimately connected with it, by their own graduation, or that of their children, it is an integral part of Salem's history. It gave the first direction and tone to the educational progress of the state; it has held rigidly to a standard of high thinking even though hungry or ragged or ill; and it is standing for a high-caste "Salem" in a million distant places on the globe where Salem prunes and paper and loganberries and paved streets are utterly unknown.

During the recent school bond campaign it was warned that if the bonds didn't carry so as to provide adequate school facilities, it would become the honorable duty of the city to frown on a rising birth rate, and to warn new-comers not to bring their children here—they might bring dogs or cats, but there was no school room for the "kids." The bonds were voted by a huge majority, in the face of this warning; the money is available, and the first unit of the great construction program the high school annex, is now almost completed. Because of the excessive cost, a econd unit, the Grant junior high school building, was rejected. But there is no reason for the stork to shun Salem, or for the sign "No Children Allowed." to be hung out over the city gates; there will be room and educational facilities for all.
