## 100° in the Shade or 10° below Zero!

One hundred degrees in the shade or ten below zero, meat deliveries to your retailer go steadily on, so that you may be assured of just the kind and quality of meat that you desire.

No city is so far removed from live stock production that it cannot receive its regular supply of fresh meats.

Compare this with the meat supply of thirty or forty years ago. Summer weather then meant salt or pickled meats in the country, and a limited variety of fresh meats in most cities.

Refrigeration, developed by scientists, has made it possible for Swift & Company, and other packers, to prepare fresh meats and ship them long distances in refrigerator cars, so that today, without regard to heat or cold, meat reaches your dealer fresh, clean, and wholesome.

In addition to the fresh meats thus available, Swift & Company prepares a variety of tempting meats for hot weather:

Swift's Premium Cooked Ham, mild and sweet, smoked over hard wood fires, is always delicious.

Swift's Premium Frankfurts, from our modern sanitary kitchens, offer a choice blending of meats and spices.

Swift's Sausage Specialties and Swift's Dry Sausage, ready to serve, help lighten the housewife's summer task.

In addition to these, a score of other Summer Specialties are made available by Swift & Company's research and development work.

Our profit from all sources averages only a fraction of a cent a pound.
