**Labor "Shortage" Hits Prison**—Since convicts at the state prison have ceased to be boarders and have been classed as paying guests, there is none idle around the institution and prison officials have more demands for men than can be filled. Farmers and others who seek convict labor are forced to leave without assistance, while several of the prison activities are being slightly delayed by the shortage of prison labor. With practically all courts in the state observing the summer vacation, there are few convictions, resulting in a dearth of new arrivals. With the courts resuming their work about the middle of September it is believed the present situation will be greatly relieved.
