An informal meeting of the committee on program met at noon yesterday and decided to ask the membership to discuss the recall of Governor Pierce at the next meeting. These discussions are really informal and free for all. No man is expected to talk unless he has something to say and he is expected to quit when he is through. This sometimes works a hardship on members but it is the salvation of the club. Full details of the next meeting will be given in The Statesman so that every whittler can pocket his jackknife and come to the meeting prepared to take one side or the other of this recall question.

Cantilever Shoe A Flexible Shoe for Your Flexible Foot

Cantilevers Are All-Day Shoes

It's not hard to find a pair of shoes that are comfortable as you walk downtown in the morning, fresh and untired; but it's quite a different matter to find a pair that will be equally easy on your feet after a long, tiring day.

Cantilevers are specially designed to give support that will prevent extreme foot-fatigue, and for this reason will be as comfortable at night as when you first put them on.

Comfort and foot well-being are the most important results of wearing Cantilevers, but they have the added advantage of looking smart for tailored wear at all times. The flexible Cantilever arch, that gives with every movement of your foot, will make you unconscious of wearing shoes at all, except for the comforting assurance of being well-shod.
