

### A PLAIN GIRL Who Made Herself the Rage of New York

By Edna Wallace Hopper

Before me is my picture as a girl. Few girls would envy me my looks. But I made myself a famous beauty. And I've kept that beauty to a grand old age. I am still on the stage playing young girls' parts, and I still look a girl of 19.

I have helped many girls to careers of beauty. To many women I have brought decades of added youth. So I am convinced that millions can attain the benefits I got. I am going to help them do it. Now I am placing at every woman's call the very helps which made me what I am.

**White Youth Clay**  
I found my greatest help in clay. Not in the crude and muddy blays so many will employ. My Youth Clay, perfected by French experts, is white and clean and dainty. It is a superclay, based on 20 years of scientific study. No other clay that I know is nearly so efficient.

**Youth Clay** purges the skin of all that clogs or mars it. It brings that rosy afterglow which so amazes and delights. It firms the skin, combats all lines and wrinkles, reduces enlarged pores. Many users, in 30 minutes, seem to drop ten years.

No girl or woman who once sees its results will ever go without it. The cost is 50c and \$1.  
**My Youth Cream**  
My old cream is another French creation. I call it my Youth Cream. It contains both lemon and strawberry. Also all the best that science knows to foster the fine texture of the skin. You have never known a cold cream to compare with this. I apply it after my clay. Also

as a night cream. Also daytimes as a powder base. It feeds, softens and protects. Youth Cream will delight you. It costs 50c.  
I use a liquid cleansing cream called my Facial Youth. A famous Parisian beauty first told me about it. Now the greatest beauty experts everywhere advise it, but they charge too high a price.  
Facial Youth contains no animal, no vegetable fat. The skin cannot absorb it. So it cleans to the depths, then departs. All the dirt and grime and refuse come out with it. I have never found a method which cleans skins half so well. My Facial Youth costs 75c.

**My Hair Youth.**  
My hair is my greatest glory. It grows finer every year. Dandruff, falling hair or grey hair have never come to me. Nor to any friend who has employed my method.  
These results are due to my Hair Youth. It is based on lifetimes of hair study. I apply it with an eye dropper, directly to the scalp. There it combats the hardened oil and dandruff which stifle the hair roots. It stimulates and fertilizes. Hair flourishes in such a well-kept scalp. No man or woman who sees what Hair Youth does will ever go without it. The cost is 50c and \$1 with eye dropper.

All druggists and toilet counters now supply Edna Wallace Hopper's beauty helps. With each one comes my Beauty Book, also a guarantee. No one can do you a greater kindness than to urge you to employ them. Go learn how much they mean. Edna Wallace Hopper. Business address, Waukesha, Wis.

Denver-bound train plunged into a stream 14 miles east of here, which was to have been completed today at Douglas, has been postponed until Sunday, according to County Coroner Hofmann of Converse county, who was here tonight. This inquest is to determine

the cause of the disaster in which 30 to 45 are believed to have lost their lives.  
The bodies of J. E. Griswold, recently of Casper, and formerly of Cedar Rapids, Ia., and J. R. Causey, an IWW of Taft, Cal., were recovered from wreckage of the smoking car this afternoon, bringing the total death list up to 18.  
Fifteen others, said to have been aboard the train, are still reported as missing. Causey was not reported as missing. Few other bodies aside from those of members of the train crew are expected to be retrieved from the train's wreckage.

### BRUSH COLLEGE

Scoring 92 out of a possible 100 points, the booth installed at the Polk county fair at Dallas again won first prize, it was announced yesterday. The Brush college booth was also first last year. A score of 100 per cent was accorded both the decorations of the booth and the grain exhibit. The color scheme was orange and black.

More than 200 jars of canned fruits were in the exhibit. The top of the exhibit was made up of a mass of asparagus and the entrance was fashioned from ferns and red, yellow and green peppers.  
Mrs. Wayne Henry was in charge of the booth.

### LOT IS DONATED SCIENCE CHURCH

Mrs. Sarah Wilson Donor  
Better House of Worship  
Within Year

The First Church of Christ Scientist of Salem is the recipient of a gift from Mrs. Sarah A. Wilson of a valuable lot located at Liberty and Chemeketa streets. Mrs. Wilson is a pioneer in the Christian Science movement in this city and services were conducted by her in the house located on the lot which she has now donated to the church. It is estimated that the lot exclusive of improvements has a value of \$12,000.

The present church building, located at 440 Chemeketa street, has been overcrowded for some time and a year ago the church purchased a lot at Center and Capitol streets. However, the present location is much more desirable and it is probable that the other property will be disposed of including that on which the present church structure is located.  
The present building located at 410 Chemeketa street is the first

Christian Science church ever constructed in Oregon and it is proposed to preserve the building by removing it to the new location and enlarging it or constructing an entirely new church on the lot.  
The lot donated to the church by Mrs. Wilson is 89 feet wide and 113 feet long and is one of the finest locations in the city for a downtown church. One of the conditions in the deed is that the property shall be occupied for church purposes within one year and it is expected that immediate action will be taken by the church looking toward the removal of the present church building to the new location. It is expected that the new home of the Christian Scientists in Salem will be a credit to the city in every respect though plans for building have not as yet been prepared.

### LABOR INTERESTED IN CONSERVATION

State Control of Water Power  
Subject of Resolution  
at Convention

PORTLAND, Or., Oct. 5.—(By The Associated Press)—Organized labor showed its interest in state conservation of "white coal" today by the adoption of a resolution bearing especially upon the situation in California where the resolution declared, the water power act, placing state credit back of municipalities in power development, submitted as a constitutional amendment at the general election in 1922, had been defeated through the efforts of private power corporations.  
Paul Scharrenberg of San Francisco, one of the proponents of the resolution declared it was time to conserve the country's water power.

"Private business interests," he said, "have seized upon the coal deposits and the process of seizing the natural resource that lies in oil is still going on. In the same way private interest is reaching out to grasp the one in exhaustible and eternal source of power upon which the peoples of the earth must rely; the 'white coal of waterpower.'"  
Scharrenberg charged the private interests in California, has spent half a million dollars in defeating the water and power act, and that when the measure comes up again its advocates would learn "what those who are opposing it are getting."

The resolution recommended to "forward looking citizens in all states the program of state conservation through the complete use and development and control of the waters of the state as submitted to California voters in the water and power act and for the service of the people at cost as opposed to corporation development and control of water resources for private profit."  
The resolution declared further against subsidizing of private corporations in water power development.

Enrollment in the schools of Sherman county for the school year ending in June, 1923, was 822, of which 647 were enrolled in the elementary grades and 175 in the high schools, according to

for vehicles upon the public highways.  
"Motor vehicle fuels taxes are credited to the state highway fund, becoming available for expenditure in the construction and maintenance of state highways."

### JULIAN ELTINGE AT GRAND WEDNESDAY

Theatre Fans Eager for  
Coming of Beautiful  
"Woman"

The ambitions of Julian Eltinge to shine as a light comedian without the lure of feminine imitations seem destined again to be postponed, as this season in the Julian Eltinge and Tom Brown Black and White Revue of 1924, which will be seen at the Grand theatre Wednesday night, Mr. Eltinge will again entertain the theatre patrons with the fads and fancies of the fair sex. A complete extensive new wardrobe has been procured for this season's tour and positively the newest creations from the studios of the leading modistes will be in evidence during the performance of Mr. Eltinge.

Julian Eltinge and Tom Brown have assembled a capable company of entertainers for their present tour, including the Six Brown Brothers, kings of the saxophone, Lew Dockstader; dean of minstrelsy; That Quartet (Sylvester, Jones, Pringle and Morell), the whirlwind terpsichorean sensation dancing mad and a chorus of many beautiful maidens that both sing and dance well, and a clown band of 49 musicians, and for entertainment from the orchestra pit the company carries its own symphonic jazz orchestra of many players.

Sherman County School  
Report is Turned in

Enrollment in the schools of Sherman county for the school year ending in June, 1923, was 822, of which 647 were enrolled in the elementary grades and 175 in the high schools, according to

the annual report filed with J. A. Churchill, state superintendent of schools, by Grace May Zevely, county superintendent. The county has 30 schools and 61 school rooms.

Total receipts for school purposes are given as \$135,465, of which \$70,064 was received from special district taxes, 10,523 from the county school fund, \$1,989 from the state school fund and \$3,559 from the high school tuition fund. The total disburse-

### FIND DIAMOND WORTH \$50,000

LONDON, Oct. 6.—(By Associated Press)—A large brandy-colored diamond, estimated to be worth \$50,000, has been found in the Wesselsen mine at Johannesburg.

The stone weighs 204 carats of irregular shape, and of a superb brassy shade.

But we do not understand that the new paper money will go any further than the old style, which was short enough, goodness knows.

# WEDGEWOOD COMBINATION

### GAS, COAL and WOOD RANGE

A Gas Range has its many advantages but there are occasions when a coal and wood range is indispensable.

In the Wedgewood pictured the two are combined in compact form, requiring no shifting of parts or adjustments are necessary, as the ovens and cooking tops are independent of each other. The lustrous porcelain enamel surface and gleaming nickel trimmings are the finishing touches to Wedgewood quality.

### TAX ON FUELS BREAKS RECORD

August Banner Month in  
Distribution of Gasoline  
and Distillate

The state tax on gasoline and distillate collected on sales made during August, 1923, aggregates \$268,377.59, representing the highest monthly distribution of motor fuels on record in Oregon, according to Sam A. Koser, secretary of state. The figures have been kept since the original tax law became effective in February, 1919.

"Taxes were remitted," says Mr. Koser, "on 8,484,968 gallons of gasoline and 553,141 gallons of distillate. Of the total collected the sum of \$87,615.39 resulted from the operation of the original law imposing a tax of 1 cent per gallon on gasoline and one-half cent per gallon on distillate, while \$180,762.20 was returned under the additional tax law providing for a uniform rate of 2 cents per gallon on all kinds of motor vehicle fuels.  
The previous high record for disposal was established in July, 1923, when sales were reported on 7,885,548 gallons of gasoline and 355,684 gallons of distillate. The August sales of gasoline represent an increase of approximately 7 1/2 per cent, and distillate sales about 54 per cent. Sales during the first eight months of 1923 exceed those made during the entire year of 1920.

"To date the motor vehicle fuels tax measures have brought to the state treasury the total sum of \$4,128,122.90. Of the amount collected under the law of 1921 there has been returned up to September 30, 1923, the sum of \$76,514.83 to operators of farm tractors, motor boats, commercial cleaning establishments, etc., pursuant to that provision authorizing refunds of taxes on such motor vehicles as are used for purposes other than in the operation of mo-
