By BETTI KESSI, Phone 109.

The members of the Sweet Briar club were entertained at the home of Mrs. C. C. Chaffee Wednesday afternoon; for the first business meeting of the season Mrs. McCall was elected as president, Mrs. C. C. Page, vice president, and Mrs. C. C. Chaffee as secretary-treasurer. Mrs. Ralph Allen was invited to become a member of the club which is composed of women living on the Wallace road.

In outlining the plans for the coming season, the club voted that their best efforts be devoted to work for the Children's farm home near Corvallis. It is possible that most of the sewing which is done during the club hours will be applied on articles for the home. Mrs. O. A. Noyes was a special guest for the meeting and assisted Mrs. Chaffee later in the afternoon when she served a lunch.

After the brief business meet-

## THE AVERAGE FIGURE

By JANE HILL.

Those of us, who have average figures are truly blessed, for our problem is much less complicated. But don't let's consider the class dismissed!

What are we doing with those figures? Do we always stand just as correctly as we did just now when we were being measured? Or do we betray our tailor by having him fit an upright-downright customer who promptly slouches as soon as she gets home, and breaks the beautiful line of her suit over the bust, and makes her collar stick out in the back?

Do we stand with one hip up and one hip down, like a weary dray horse? Even Helen of Troy couldn't look lovely in that position—or the equally bad one we assume when we poke our necks out like so many humpbacked turtles. We all know how to stand. But—do we do it? Let's practice for even a single week and see the difference it makes.

But first, let's be sure our fall from grace hasn't been due to the wrong corset, or slouching often comes from sheer weariness, and, oh, what weariness creeps into our very bones under the maddening pressure of a corset that chooses our favorite nerve on which to fit too soon! Did we get the correct size in the first place? The comfortable length? The right weight? Did we have the corset laced correctly? Are the garters adjusted as they should be?

Very few of us are ideal average. There is always a bit of coaxing to be done—a little erasing, a subtly straightened line, a comfortable support. With remarkably few bones and no undue restraint, the proper corset designed for the average figure brings it gently but surely to its ideal perfection and eternally guards you from the injustice of looking older than you are.

Madam, How Do You Move? Litheness and grace of movement are intimately tied up with this matter of standing correctly and wearing the right corset. No woman can be truly beautiful or even charming, unless she's lovely when she walks, when she bends her head and listens to you, when she plays the piano, when she dances, or sits on the floor with her kiddies, or sews a seam. Nerve tension expresses itself in jerks. And, just here, let us say that irritability prevents many an otherwise good-looking woman from ever being classed as such.

And the wrong corset may have almost as much to do with irritability as the wrong creed!

Stand correctly. Move rhythmically. So far, so good. That advice applies to the whole group, and to all the groups, too. But what shall we wear when we do it?

The Fashion Parade chez Mol. Let each of us "average figures" go offstage and get her favorite afternoon dress and come back caring it. Maybe it wasn't made this year. Perhaps it's a three-year-old gown we liked so much we just can't bear to give it up.

Why did we like it? Gertrude says, "I like mine because the blue is just a bit deeper than my eyes. It makes them look wonderful. Ted said so."

Jane says, "I like mine because that drapery over the hips conceals the inch that oughtn't to be there—nobody knows whether it's

hip or frock!" Marion says, "I like mine because that neck-line hides those mean little collar-bones and yet shows my neck to advantage—and it's a nice neck, if I do say it myself."

Cynthia says, "I like mine because it's so clever in the line it takes over the bust. I need to be careful just there, even if I did reduce 20 pounds to get back into the 'average' group."

Norma says, "I like mine because it's so simple. I don't believe I have a single real figure-defect, and this dress follows every line I have and doesn't muss up the effect with trimming."

And yet, how many of us will remember these little personal reasons when we go to get the next dress? Wouldn't we have you'll learn.

been much better dressed in the past if we'd paid a little less attention to changing modes, colors, and the desire to have something different at all costs, and more attention to reproducing, in some way or other, the point that had made last year's frock a success? Surely we can be up-to-date and yet remember the especially becoming way of presenting ourselves.
