quality walnuts, all of which will be handled through the Salem plant as the association has but one grader and vacuum sorter. The sales department is guaranteeing the association brand and consequently is demanding nuts of high standard.

der way in a few days, and instructions have been sent to growers by the association, calling attention to the blight that has been reported from several sections and the proper methods of gathering, washing and drying. Included in the directions are the suggestion that the orchard should be gone over twice a week, and in case of inclement weather, oftener. When two varieties are grown in the

same orchard, care should be taken to segregate these. Care should also be taken during the drying process so as not to allow too high a temperature. This, the night at 7 p. m. It is a story of chitect or builder to destroy the ly he resented the dereliction directions say, should not exceed 90 or 95 degrees, while some dryermen maintain a steady temperature of 80 degrees during the entire season.
