WHEAT VALUES ARE STRONGER IN EAST

Talk of Liberal Buying of **Export Wheat Brings** Brisk Demand

CHICAGO, Nov. 13 .- Undoing of spreads between wheat and corn today involving the purchase of wheat and selling of corn helped to strengthen wheat values but tended to weaken the corn market. Wheat closed firm, 1/2 @ 5/8 to %c higher. December \$1.03% to \$1.03% @ % and May \$1.08% to \$1.08 %. Corn finished unchanged to %c lower, oats unchanged and provisions varying from 7 cents decline to a rise of 2

Traders who previously had sold wheat were the chief buyers of that cereal throughout the day and in the absence of any aggressive new pressure from bears the market showed gains all the time except for one moderate setback about middle of the session. Some buying here on the part of the Winnipeg houses was also regarded as the closing up of spreads. This, together with relative firmness of Liverpool quotations on wheat tended further to lift valnes in Chicago. There were reports too, from Minneapolis of a brisk demand there for choice milling wheat and some talk was current of liberal export buying of flour at the seaboard.

A big increase of the United States visible supply of wheat failed to have much effect on the market having apparently been taken for granted. On the other hand, the possibility of food relief measures for Germany attracted some notice and was a factor in making shorts nervous.

Reports indicating that rains

were less general than had been expected took away much of the bullish aspect of the corn market. Besides, receipts were a little larger and the southwest predicted curtailment of the feeding de-
