MEXICAN REVOLT  
IS COMPLICATED

Opposing Factions Make Claims and Counter Claims of Positions

(By The Associated Press)  
The claims and counter claims of the opposing factions in Mexico still make impossible any exact appraisal of the prevailing situation. Each side is claiming successes for its arms and each is denying as untrue the official declarations of the other.

As an instance of these conflicting claims, the revolutionists assert that they have been victorious over the federal forces in the chief area of hostilities east and southeast of Mexico City and now are in a position formally to advance upon the capital, while from government sources comes a statement that not alone have the De la Huerta troops been defeated, but are being driven back toward Vera Cruz, from which point they began their advance with Mexico City as its chief objective.

There is practically no news regarding the situation in other parts of the republic than the zone between the capital and the Gulf of Mexico.

Such reports as are creeping in

across the American border are badly delayed.

As an instance of this, revolutionary advances reaching Nogales tell of the capture by rebels of Puerto Mexico, southeast of Vera Cruz, on the Gulf of Mexico, and of Acapulco, on the Pacific in the state of Guerrero. Both these towns are reported several days ago as having fallen into the hands of the De la Huerta faction.

An uncivilized land is one in which the criminal courts are not behind with their work.

NEW LAMP BURNS  
94% AIR

**Beats Electric or Gas**  
A new oil lamp that gives an amazing brilliant, soft, white light, even better than gas or electricity, has been tested by the U. S. Government and 35 leading universities and found to be superior to 10 ordinary oil lamps. It burns without odor, smoke or noise—no pumping up, is simple, clean and safe. Burns 94% air and 6% common kerosene (coal oil).

The inventor, V. M. Johnson, 151 Union Ave. N., Portland, Ore., is offering to send a lamp on 10 days' FREE trial, or even to give one FREE to the first user in each locality who will help him introduce it. Write him today for full particulars. Also ask him to explain how you can get the agency, and without experience or money make \$250 to \$500 per month.

UNION OIL TEAM  
TAKES FIRST GAME

Championship Series Begins—Mardis, Ashby and Ross Star for Winners

Turning the tables on the Hauser Bros. team the Union Oil quintet took the first of the championship games last night by a score of 31 to 11. The winners ran rings around Hauser Bros. putting the ball in the basket almost at will.

Mardis, Ashby and Ross starred for the Union Oil. Ross made three baskets, from almost the middle of the floor but was put out at the last of the game for personal fouls. Hauser Bros might have had a chance if it had not been for Ross who was able to shoot baskets from the floor so skillfully.

A preliminary between the Anderson and Brown and Standard Oil teams failed to materialize and Anderson and Brown played

an all star team tying the score, 2 to 2.  
Mason of the ONG was referee. The game was slow due to the slippery floor.

## SPORT BRIEFS

**PORTLAND, Or., Dec. 20**—Phil Patterson, manager of the Multnomah Amateur A. C. football team, received a telegram today from Scott high officials of Toledo, Ohio, asking him to represent them in the game with Columbia university at Multnomah field, New Year's afternoon. Patterson wired that he would look after preliminary details, but they had better send a man to represent them here.

**CORVALLIS, Or., Dec. 20**—Basketball is being drilled into the rook squad at Oregon Agricultural college in real variety style of play, known as "Hager's five-men defense."

"Spec" Keene, in charge of 150 yearlings until "Cac" Hubbard returns from Honolulu with the varsity football team, will drill the men in fundamentals until the end of the quarter.

announces a

## NEW OIL for FORD CARS

For six years our research laboratories have been experimenting with Ford Lubrication. The result is now ready. It is Zerolene "F" for Fords—a clear, bright golden oil, good to look at as it comes from the container, and good on the job.

The first and most essential requirement of a Ford lubricant is that it get to the parts requiring lubrication—especially the wrist-pin bearings and the upper cylinder walls that frequently are "oil-starved."

We believe that Zerolene "F" for Fords meets this requirement better than any oil yet offered to the Ford owner. It will penetrate to every part of your Ford needing lubrication and lubricate it perfectly. Its use will result in greater gasoline mileage, freedom from valve-sticking, fewer carbon-removal operations, and a general reduction of all your up-keep costs. Because it reduces friction and wear to a minimum, it will prolong the life of your Ford.

We have proved these claims to our own satisfaction by extensive tests in our laboratory and on the road. We urge you to prove them for yourself by cleaning out your crankcase and refilling with Zerolene "F" for Fords—the last word in Ford lubrication, now offered to the public at Standard Oil Service Stations, garages and at other dealers. Zerolene "F" for Fords is not an expensive oil. It costs not more, but less than any of the special Ford oils now on the market.

A Ford, well treated, is an A-1 transportation investment. Protect YOUR investment by proper lubrication.
