

SALEM STUDENTS ARE ALL ACTIVE

Seventy-five at OAC Registered From Here, 119 From Marion County

OREGON AGRICULTURAL COLLEGE, Corvallis, Dec. 22.—Salem is well represented at OAC this year, with 75 of the nearly 3000 students in college registered from Salem.

Eugene "Luke" Gill, three-year letterman in football, is now on his way to Hawaii with the team.

Amory "Slats" Gill, a three-year letterman in basketball, is captain of the team this year and is sure of a place on the all-coast

A SUGGESTION TO PARENTS

What happier Christmas present can you select for your son than a life membership in the Hemphill Trade Schools? For seventeen years, we have been educating men in the field of vocational education.

EMPLOYMENT DEPT. Hemphill Trade Schools, Portland, Ore. Broadway 0534

mythical five this year. Gill is a member of the Varsity "O" association, Phi Delta Theta fraternity, and is a junior in commerce.

Claude Darby, senior in mining, is one of the leading engineering students on the campus. Last year Darby was manager of the Student Engineer, the college engineering publication.

Edward Clark, senior in electrical engineering, is another letterman in football. Clark was not able to play on the team this year, having already earned his three-letters in football.

Catherine E. Barhyte, senior in vocational education, is one of the leading women athletes on the campus. Miss Barhyte is on the varsity baseball team and the senior-class basketball, basketball and volleyball teams.

Other sophomores from Salem are Jack Crawford, pharmacy, a member of Beta Theta Pi fraternity; Helen Currie, home economics, a member of Delta Zeta sorority; Richard Schei, commerce, a member of Tau Sigma Phi fraternity; Elwood Shoemaker, civil engineering, a member of Square and Compass fraternity; Annabelle Golden, home economics, a member of Delta Delta Delta sorority; Marie McNair, home economics, a member of Gamma Iota sorority; Jennette Meredith, commerce, a member of Kappa Alpha Theta sorority; Burton Adams, chemical engineering; Itol Bailey, home economics; Emery Dieffenbach, mechanical engineering; John Elwood, electrical engineering; Harold Flis, pharmacy; Marie Rosenfeld, vocational education, and Loreta Miller, vocational education.

Freshmen registered in the school of commerce this year are Ruth Bartruff, Esther Carfield, Willard Frazier, Walter Fuhrer, Bernice Kirkwood, Marlowe Miller, Ruth Peck, Russel Pratt and Alice Putnam. Freshmen registered in pharmacy are Norris Clement, Fred Davenport and Lewis West.

First year men in the school of engineering are Burdon Adams, chemical; Gerald Leland, chemical; Winfield Clarke, civil; Clifford Hulsey, electrical and Leonard Porter, electrical.

First year women registered in home economics are Lucille Moore, Prudence Patterson, Hattie Pierce, Helen Ramsten, Rita Reid and Willetta Welch. Theodore Hurbeta is the only freshman registered in industrial arts.

Julia Patchin is going graduate work in home economics. Lester Laws is a vocational student in agriculture. Students registered for special work are Thomas Ives in civil engineering and Elmer Schoon in commerce.

Claude Darby, Edward Clarke and Catherine Barhyte.

Three juniors, Albert Bayne, pharmacy; Fred E. Klaus, agriculture, and Richard M. Kriesel, mining, are members of the Intercollegiate Knights. Bayne is a member of Kappa Psi, Klaus of Sigma Gamma, and Kriesel of Sigma Phi Epsilon.

Other juniors from Salem are Hattie Reeder, commerce, a member of Delta Delta Delta sorority; Wallace Schei, commerce, president of Tau Sigma Phi fraternity; Mabel Dotson, home economics; Rebecca Howe, vocational education; Malcolm Smith, chemical engineering; Herbert Welch and Arthur Wendland, mechanical engineering, and Frances Robbins, vocational education.

Loris Baker, sophomore in commerce, is on the varsity basketball squad this year, a member of the sophomore cotillion committee and Phi Delta Theta fraternity. Julian Burroughs, sophomore in electrical engineering, is on the varsity swimming team and is a member of Sigma Phi Epsilon fraternity.

Frank G. Dechow, Jr., is a sophomore in commerce, a member of Hammer and Coffin, national honorary college humor society and of Kappa Sigma fraternity.

Other sophomores from Salem are Jack Crawford, pharmacy, a member of Beta Theta Pi fraternity; Helen Currie, home economics, a member of Delta Zeta sorority; Richard Schei, commerce, a member of Tau Sigma Phi fraternity; Elwood Shoemaker, civil engineering, a member of Square and Compass fraternity; Annabelle Golden, home economics, a member of Delta Delta Delta sorority; Marie McNair, home economics, a member of Gamma Iota sorority; Jennette Meredith, commerce, a member of Kappa Alpha Theta sorority; Burton Adams, chemical engineering; Itol Bailey, home economics; Emery Dieffenbach, mechanical engineering; John Elwood, electrical engineering; Harold Flis, pharmacy; Marie Rosenfeld, vocational education, and Loreta Miller, vocational education.

STATE WARDS TO ENJOY HOLIDAYS

Dinners and Programs to be Featured at Several Institutions

Christmas cheer as well as special dinners will be shared by inmates of the various state institutions on Christmas day.

For the 14th consecutive Christmas Frank Bligh, manager of the Bligh theater, will provide vaudeville and moving pictures at the penitentiary during the morning. A special dinner will be served at noon. The dining room of the prison has been decorated for the occasion, fir trees and balsam branches being used profusely.

In addition to a big dinner, inmates of the state hospital will have a special program, chiefly musical, followed by a radio concert in the chapel. The main lobby of the institution has been decorated for the holidays.

Unless someone takes pity upon those confined to the tuberculosis hospital, these people will not have much of a program, inmates having consented to provide some entertainment to the best of their ability. The hospital has been decorated and whatever program they have will be given Christmas eve. A big dinner will be served Tuesday.

The boys' training school has a program similar to other institutions, though this will be provided chiefly by the boys and will be of a musical nature. The school has been fittingly decorated and another big dinner is planned.

Christmas is extending over the entire week to a great extent at the girls' industrial school. They will have a Christmas tree Monday night, with a fine dinner and program Tuesday, and moving pictures Wednesday. Thursday they will go to the feeble minded school and present their program.

Inmates of the feeble-minded school had their program this last week, but will have a Christmas tree Tuesday, with candy and nuts in addition. The school has been decorated for the season.

With a majority of inmates of the deaf school and the blind school already home, there will be no extensive observance of Christmas made. A few little parties and Christmas trees will be staged for those who are forced to remain. They will also be given good dinners.

FOOTHILLS ARE CLEAR OF SNOW

Tin Lizzies Came Down from the Little North Fork Mines on Thursday

Here it is almost the night before Christmas, and the shank of the evening of the old year, and—Yes, we have no snow today; and we have not had any in the Willamette valley.

They had 18 inches of the fleecy, however, in the foothills a couple weeks ago, and it was that deep in the mining district on the Little North Fork of the Santiam, and on the road leading to that district.

All Gone Now But the snow is all gone now. Men came out from the mines on Thursday in tin Lizzies, and found the road free of snow all the way.

That is saying a good deal for the last days of December, for the camp of the Lotz-Larsen Mining company, and of the Gold Creek properties, is only about seven miles from the summit of the Cascades as the crow flies. It would be a good deal farther if you had to walk it.

Ready to Open The Lotz-Larsen people have just put in some new machinery preparatory to getting their concentrating plant all ready to run. They expect to start the first of the year, and by reducing their ores they expect to make their mine a real mine—a paying proposition. In fact, they made a profit this year on their shipments to the Tacoma smelter; and these shipments were not concentrated and they had to stand a trucking charge of \$10 a ton, besides the high freight charges.

With the concentration plant going, it looks like there is at hand the period of real mining—profitable mining—all over that district; with great developments in the making in the not distant future.

NEW CORPORATIONS

The following articles of incorporation were filed Saturday with the state corporation department: Imperial Auto Sight-Seeing company, Portland; Incorporators, Morris A. Natarius, William F. Caplain, John P. Hannon; capitalization, \$5000.

Service Stores, Inc., Medford; Incorporators, B. W. McQuat, C. S. Prael, J. A. Moffatt, B. W. Moffatt; capitalization, \$10,000.

Brown & White agency, Medford; Incorporators, J. C. Brown,

E. M. White, A. J. Crose; capitalization, \$5000; brokers. Riverside chapel, La Grande; Incorporators, Mrs. Rosa N. McEwen and others; assets, \$1000; non-sectarian Sunday school.

Under the blue sky act the following permits were granted: Perfector Trunk Manufacturing company, Portland, to sell stock in the sum of \$50,000.

Western American Publishing company, Portland, to sell stock in the sum of \$24,000.

Smith-Long Laboratories, Portland, to sell stock in the sum of \$5000.

R-A-D-I-O

By F. S. BARTON

The western radio public is still making inquiries concerning the trans-Atlantic tests conducted by the Radio Broadcast magazine in this country and the Wireless World and Radio Review of London, assisted one might say by the entire radio public of the United States and England. "Hello America" was not heard west of the Rockies, so far as known, but the eastern coast states were most fortunate in hearing music and speech from England, sent out from that country from 3 to 3:30 in the morning on test days. This unmerciful hour was selected for the tests in order to take advantage of the better receptivity that prevails during night hours. This might not be so vital a matter if English stations were as high powered as our own which are heard throughout that country as distinctly as their own nearby stations in some instances.

It won't be long until it will become possible for the king of England or a president or premier of any country to call up our president before breakfast and ask him about every little old thing that has happened since the night before. As a matter of fact this may not take place, but it is probable that they will be greeting each other officially from country to country before very long, for the dove of peace is flitting around the international radio towers if nowhere else in the world. The radio speeches of David Lloyd George when he was in this country recently had peace for their subject, and Owen D. Young, in his broadcast from WGY on November 28, said: "Men who talk with each other daily with the object of better understanding, do not fight. Let these international conversations go on."

The Missouri state prison band is becoming one of the favorites of the air and Oregon people appreciate the opportunity of hearing these fine Monday concerts at an hour of the night when the air is pretty well cleared at 11 o'clock.

Dr. E. E. Free has an amusing as well as illuminating article on electrons in the January number of Popular Radio. This is one of the things he has to say about these fascinating invisibles: "The electron is just as definite a thing, really, as an apple or a locomotive. It is possible to form just as clear a mental picture of an electron as you have now of everyday things like these. . . . Suppose we imagine a penny that has magically enlarged until it is larger than the whole earth, larger than the sun, as large, finally, as the earth's orbit. It would be, then, a great copper disk 189,000,000 miles in diameter. The sun would be at its center and the earth would be rolling, once each year, around its edge. What would the atoms and electrons inside of it look like now?"

The nuclei of the copper atoms would show up now as roundish things about 11 inches in diameter, like old fashioned cannon balls or small sized goldfish globes. And now for the first time we would see the electrons, too. These would be roundish balls also, each about three inches in diameter, but they would not be quite spherical. Instead, they are flattened a little on two sides, like a ball of soft rubber when you squeeze it between your hands. In our enlarged earth's orbit sized case the electrons would be about the size and shape of a fairly large turnip."

No doubt Dr. Free is right, but we own that our turnip perceptions are much clearer than our electron perceptions even at that. Percy Mackaye says in a magazine article that radio is an instrument of Phoebus Apollo that may revolutionize civilization, and that "radio indeed puts upon us a supreme test of imagination." Boys are inclined to agree with Mr. Mackaye, for they find their mothers frequently fall in this test of imagination and see only the physical paraphernalia and hear only the incidental noises, and none of the magical music of far spaces: Mother's imagination is quickening, however, now that the compact radio sets no longer offend her eye and the A batteries no longer cause her feet to stumble when she walks around the kitchen table.

GO TO CONDON SILVERTON, Or., Dec. 22.—(Special to The Statesman)—Mr. and Mrs. Edward Finley of the Evergreen district left today for Condon, Ore., where they will spend the Christmas holidays with relatives. They are making the trip by motor car and expect to be gone about a week.

SILVERTON, Or., Dec. 22.—(Special to The Statesman)—The Silverton OAC club gave a social party at the club rooms of the Knights of Pythias hall Friday evening. Progressive five hundred was the diversion of the evening. The club rooms were decorated with a Christmas tree, mistletoe and holly. The window seats were covered with robes and OAC cushions. Walter Davis was high score man for the evening, winning a deck of cards. Refreshments were served at the close of the evening.

Those present were Mr. and Mrs. Edward Finley, Mr. and Mrs. Walter Davis, Miss Ann Hobart, Theodore Hobart, Elgin McCleary, Robert Seman, Ernest Havernick, Miss Winona Palmer, Miss Lillie Madsen, Miss Vivian Cramer, Harry Riches, Frank Riches, Fred Banks, and Harold Larson.

Community Program To Take Place Christmas

SILVERTON, Or., Dec. 22.—(Special to The Statesman)—The community Christmas tree program will be held Christmas day at 5:00 p. m. at the community tree at the intersection of First and Main streets. This program will consist of Community singing, selections by the 4-L band, invocation by Rev. C. J. Lyda, talks by Rev. J. Bennett and Rev. G. Henriksen, selections by a male quartet, and benediction by Rev. S. Lindseth.

Cured His Rupture

I was badly ruptured while lifting a trunk several years ago. Doctors said my only hope of cure was an operation. Friends did me no good. Finally I got hold of something that quickly and completely cured me. Years have passed and the rupture has never returned, although I am doing hard work as a carpenter. There was no operation, no loss of time, no trouble. I have nothing to sell, but will give full information about how you may find a complete cure without operation, if you write to me, Eugene M. Polton, Carpenter, 492-K Marcellus Avenue, Manassas, Va. Better cut out this notice and show it to any others who are ruptured—you may save a life or at least stop the misery of rupture and the worry and danger of an operation.

Christ Child Posters On Foster-Kleiser Boards

Something new in the way of advertising is to be seen on one of the Foster and Kleiser billboards on Perry, just north of the WCTU headquarters on Commercial. This is a huge poster of the "Nativity," in colors and approximately 8 by 12 feet in dimensions, and is known as a 24-sheet poster.

The advertisement, if it can rightly be called such, is the gift of the advertising firm. It represents the birth of the Christ child, who is being held by the Madonna. There is a group of shepherds while the three Wise Men have just arrived, servants holding their steeds just outside.

The advertising firm has but one of these posters in Salem, but has placed others in the district, one each in Albany, Silverton, Scio and Lebanon. Last year they were also received and placed throughout the district, while they appeared in other sections of

the country as well. The billboard has attracted considerable attention and the men putting on the posters report that many people stopped and watched them, owing to the unusual nature of the poster.

Five Druggists Arrested By Prohibition Agents

FRONT—MINNEAPOLIS, Dec. 22.—Five druggists, a hotel owner, and four other men were arrested tonight by federal prohibition agents in pre-holiday raids to shut off the flow of "Christmas cheer" liquor. Four of the men were taken at a "novelty" advertising agency, where agents said they arranged to purchase seven cases of liquor.

CHICHESTER'S PILLS

If you are afraid to take a speculative chance on a few dollars with an expert mining man who has spent a fortune and nine years of his life, proving that his judgment was correct—and if you don't want to take any chances on a few dollars making a lot more for you—or if you don't have any interest in developing a great project at your very doorstep, or if you haven't anything but hair and bone above your collar, don't, please don't, read any farther. You might as well save your time and effort.

But if you are interested, if you believe in the sincerity of H. H. Lotz and associates if you believe that a shipment of 50 tons of ore which netted nearly \$700.00 is any indication that the ledge should be mined after it has been opened up for more than 1000 feet, and if you want to help in developing possibilities that may make this one of the greatest mining districts in the west, then you will be interested to know that a

New Strike of Ore Has Been Uncovered on the Lotz-Larsen Property

You don't believe it perhaps, a lot of people don't believe anything, but there is worlds of proof here for the most skeptical, if they will take the trouble and time to investigate. The inspection of the laymen, engineer, geologist, chemist, assayer or hard rock miner is invited. Can one go farther to prove the sincerity of their judgment?

TEN-DAY SPECIAL OFFER The shares now being offered at \$1.00 each are moving rapidly, and they will, in all probabilities be the last ever offered at anything like that price, and no guarantee is made that any more of treasury stock will be sold at any price when this block is gone, for the mill will be started to crushing ore on or about the second of January, 1924, or in about ten days, and it is expected that no more necessity for stock sale will arise. A great many small investors have wanted to purchase stock on a partial payment basis; this has not been possible until now, and for ten days this favor will be granted, that the small investor may have an opportunity with the larger.
