THE WORLD'S BEST CELERY DISTRICT

The Slogan editor has been saying for a long time that the Salem district can grow and does grow the best celery in the world. Here are some proofs: Eugene celery in 1921 took second prize at the national celery contest; and Prof. Bouquet of the Oregon Agricultural College said the Oregon exhibitors gained a greater victory than the taking of the prize in that contest. Troutdale celery took first prize in 1922 at the national contest at Indianapolis-and it was taken by a man who was a celery grower before coming to Oregon in the famous Kalamazoo, Michigan, district.

The Labish Meadows district, just north of Salem, produces as good celery as that grown at Eugene or Troutdale-Produces the best in the world.

The Labish Meadows celery, 200 car loads of it, shipped last year to points outside of Oregon, brought \$1 a crate above the price of the famous California celery. That means \$160 to \$180 a car above the market price for the California product.

Do you realize what else that means? It means the development here of a gigantic celery industry. Our district will ship out at least 250 cars this year. The acreage will grow every year. It may go up to 4000 to 5000 cars annually, and in a few years. It is bound to become such a gigantic industry in good time, because of the immense money value of quality. It is enough to make up the difference between profit and loss, or between small profits and large gains.

The world is the market. Celery fresh from our fields now goes in car lots as far as Birmingham, Alabama. It will go much farther. For dehydrated celery there is no limit in markets under the shining sun,

The pioneering has been done. The proofs are at hand. Our growers can produce celery and make it a profitable crop

But, what is more important, they can produce celery of the best quality grown in the United States; which means the best in the world-and they are doing just this.

For the Salem district, this is another case of taking the line of least resistance; of getting above competition; of producing the things we can produce better than any other district, as an American citizen. Jest what or at a lower cost, or at a greater profit; of doing the things at is back of the inquiry is hard to

in fifteen years; in two years. What was a dream a short time ago has partly come true; is a clear vision now; a certainty of some time in the future, and perhaps not far distant future.

There is no mystery about the celery industry here. What pense certainly is entitled to a and I noticed the start she gave crops. It's a mighty good thing. one man has done, or what a few men have accomplished, can square deal, and the people will at the sight of the women. ONE REEL YARN

POOR LITTLE CHILD

"Ten dollars!" beamed the young man as he swung along the street. "If you once break a bill the whole thing's gone! I'd like to see anybody make me spend penny between here and the bank on the next corner." He was so engrossed in the vision of a savings deposit, that for a moment he was unaware of terrible screams and cries that pierced the air around. Suddenly the shricks penetrated his ear.

In the middle of the sidewalk, directly in his path, stood a tiny girl, her golden curls tossing, as she stamped her little feet and yelled at the top of her lungs. Her angelic face was streaming with tears. "Why, you poor little girl, what's the matter?" asked the young man bending over her. She only sobbed and pointed a chubby finger across the street where two boys with ice cream cones were yelling, "Look at Alice, Cry-baby Alice!"

"I know! You want an ice cream cone," smiled the young man. Fresh sobs broke from Alice. Gently he took the child by the hand and led her inside the drug store before which she had stood. "An Here the public is presented with a play containing a real problem. ice cream cone for the young The old situation where the early bird gets the worm has been complilady." he ordered. cated by introducing TWO early birds, the result being the eternal Sight of a heaping cone stilled

the little girl's weeping. Her angelic mouth curved in a smile as lem, and a factory for making the theatre which you cut out of the paper Monday. The thumb tack the man led her outside. "Are you happy now, Alice?" he asked. She looked up radiantly. "Oh, wess, sir," she cooed. "If woo hadn't come along, I would have had to spend my nickel, wike my bruvvers did." Though the object of the photoplay is somewhat stretched, the star,
