JUSTICE JOHN MCCOURT TALKS ON ENFORCEMENT OF STATUTES - JUSTICE John McCourt, member of the state supreme court, gave the following address on law enforcement before the Six O'Clock club, men's organization of the Methodist church, Monday night. The prevalence of the violation of the criminal laws throughout the country, as recorded in the daily press, has become a matter of great concern to the public, moving citizens everywhere to inquire what their duties are in the circumstances. The degree to which any duty is discharged depends primarily upon the understanding of the requirements of that duty possessed by the individual upon whom the duty rests. Without a reasonably clear understanding of the subject-matter of the duty and the relation that the individual bears to the subject-matter, citizens cannot know the obligations that are imposed upon them nor how to discharge such obligations. Usually when men and women know that they have a duty to perform and also know what that duty is, they arise to the occasion and exert the effort necessary to properly respond to that duty. This applies to all human conduct and particularly to the response that the average citizen makes to the enforcement of laws enacted to guide his conduct and to protect his rights.

One hundred per cent observance of the law has never been attained under any form of government. Laws against homicide, larceny, burglary, arson, gambling and laws to enforce observance of the social conventions, are as old as society itself. But violations of those laws are of frequent commission, regardless of the extent or character of the punishment that is meted out for such violations. Yet no one will say that such laws should be dispensed with, or that there is any abatement of the absolute obligation and duty of the citizen to observe them or refrain from their violation. The great majority of people observe them constantly and frown upon those who violate them. We hear no suggestions from any quarter, that citizens may disregard any law enacted under the forms prescribed for its adoption until attempts are made to regulate what some private conduct or the private affairs of the citizen. When this government was formed, society and business were without the complexity they present today. The population was small; there was ample room for communication. And necessarily such intercourse as was possible with the crude transportation facilities which then obtained, was carried on without any interference by one neighbor with another. But now our population has become so great, our necessary contacts one with another so varied, frequent and constant, that many regulations affecting the conduct of the citizen are absolutely necessary in order that we may live together peaceably and in a manner most conducive to our comfort and happiness. And so regulations that might have been regarded as an interference with the citizen in times past are absolutely essential now. The government formed by the fathers was not intended as a temporary organization for the generation in which it was created, but was designed to endure and to promote
