Build Your Future On a Firm Foundation

Education, experience, and natural ability may all spell success. But although this is a strong foundation there is one element that has been left out that may cause it to crumble and fall away. That element is capital. Make your foundation solid and secure by depositing regularly a portion of your earnings in the United States National Bank. Then you will not endanger the other elements of success and cause failure.

Why not send a copy of this big paper to your friends?

Think it over. If you were to receive from som e of your friends a great big edition of that friend's home town paper and it was filled with facts from cover to cover, wouldn't it make an impression on you? It certainly would, and if you were intending to make a change in the location of your home or business, that very edition would probably sell you the idea that there was the place to go. Exactly so: and last year's edition of the Statesman brought several families to the Willamette valley. Some are in business and all are good, clean, prosperous folks, and we're glad they came. We need new people all the while, to keep us old timers from getting into the proverbial "rut" and slumping.
