**They Overlooked the Diamonds**

HERE is a modern flippancy to the effect that, "What you don't know won't hurt you." It is also a fallacy. For instance:

The farmers of Kimberley were a disgusted, disheartened lot. They said the soil was too rocky to earn them a living. Some of them left. Others died in poverty.

And all the time their children were playing with diamonds.

But the farmers didn't know. They thought the priceless gems were pebbles.

Don't be like those Kimberley farmers. Know!

Don't seek opportunity in some distant place and overlook the diamonds that are daily within your grasp. Know!

Advertising is a mine of opportunity. It tells of values you wouldn't know about if it were not there to guide you.

The secret of economical buying is information. The man or woman who is best informed is the one who buys to best advantage.
