and **Dr. Paul G. Stapan, 1484 State St., Salem, Oregon,** are Chiropractic doctors.

The Abrams method of Electronic Diagnosis and Treatment is not taught by chiropractic doctors by Dr. Abrams. These doctors, at 1484 State street, have removed the words Abrams' Method from their sign, but instead use the "E. R. A." on their sign and advertisement. This is misleading and has caused persons to start treatment with them, thinking they were receiving the real Abrams treatment. The letters E. R. A., with periods after them, stands for Electronic Reactions of Abrams. While these doctors, who use the imitation machine, use the E. R. A., without the periods, this is misleading and has caused persons to be misled and to take their treatment. For facts address

BITS FOR BREAKFAST

We can do it—
Tom Kay made the Salem Chamber of Commerce noon luncheon crowd sit up and take notice yesterday—

He told them that we produce here the finest fiber flax in the world; that the industry can be built up here to the point of bringing to this district \$100,000,000 a year for the manufactures of flax; that this will lead to the employment, directly and indirectly, of a million people; and that the Willamette valley can raise a \$300,000,000 annual crop on the land, and support in comfort and prosperity 3,000,000 people.

That sounds like a big thing, compared to the present production of the land in the whole state of \$20,000,000 worth annually. But it is not at all out of the way—it is coming. And even then the possibilities of the Willamette valley will not be worked to the limit; not even to half the limit.

Every acre of the 3000 for growing the flax crop of 1924 for the state flax plant has been contracted or spoken for. There can be no more acres included, unless some of the land offered is found unsuitable.

There will be a number of additional Canadian pullers in the flax fields the coming summer. How many is not yet known.

The retting tank capacity at the state flax plant will be doubled before May 15. Work on the new tanks will be started at once, with prison labor. During the summer, more retting tanks will be built, doubling the capacity again. In other words, the present retting
